WHOLESALE PRICE LIST

HARRIS' SEEDS

for MARKET GARDENERS and FLORISTS

Golden Plume or Wonderful Celery

Grown from Harris' Seed by C. F. Duerr, Irondequoit, N. Y. (See page 8)

JOSEPH HARRIS COMPANY, INC.

Moreton Farm

COLDWATER, N. Y.

Free Delivery of Seeds

All seeds included **in this price list**, except Peas, Beans and Corn, will be sent prepaid by parcel post, express or freight **at our option**.

Shipments of Peas, Beans and Corn which, alone or including other seeds, weigh 100 lbs. or more will be sent by **freight** prepaid.

*On shipments of less than 100 lbs.; if 5c per lb. is added to the price we will pay transportation charges on Peas, Beans and Corn to places in the United States, (except New York State west of Utica and Binghamton where **no extra amount** for transportation charges is required).*

To places in Canada add 10c per lb.

Make Your Order 100 Pounds or More

You will notice we prepay freight charges on all shipments of garden seeds weighing 100 lbs. or more.

If your order does not amount to as much as this it will pay to get your neighbor to order with you so as to get free transportation.

The above offer to prepay transportation charges does not apply to Potatoes, Fertilizers, Field Seeds, etc. Articles other than seeds which are listed in this price list are to be sent at purchaser's expense except where quoted "postpaid."

About Ordering, Shipping, Etc.

Orders may be sent at any time and goods will be shipped at the time specified on the order.

Freight shipments are now handled by the railroads much more promptly than formerly and we advise having all heavy shipments (100 lbs. or more) sent in that way.

Seeds ordered sent **by express** are sent at purchaser's expense.

When ordering seeds shipped by freight or express please **be sure to give the name of your nearest freight railroad station or express office if it is different from your postoffice address.**

Terms and Discounts

Cash with order. When cash is sent **with the order** we allow a discount of 3 per cent which may be deducted from the total amount of the order.

Time payments. To gardeners of established credit and to those who furnish us with satisfactory references we allow the following terms:

Bills for seeds, plants, etc., shipped after January 1st are due and payable August 1st.

Bills for goods shipped after August 1st are due December 1st.

JOSEPH HARRIS COMPANY, Inc.
Coldwater, N. Y.

A Guarantee

Harris' Seeds are so carefully grown and so thoroughly tested before they are sent out we know they are of the highest quality. Nevertheless if any seeds bought of us do not grow or fail to be as represented, we will replace them without charge or return the money paid for them if we are notified **at once**. In other words, every purchaser of Harris' Seeds is protected to the full amount of the purchase price.

There are so many conditions that affect the growth of crops over which we have no control that we cannot hold ourselves responsible for any loss beyond the amount paid for the seeds.

Be sure Your Name and Address is on the Order Sheet.

Over 900 bu. of dry ears from 10 Acres !

One of our crops of Harris' Extra Early Bantam Sweet Corn curing in the field on a nearby farm, before being put in our dry houses.

Pay Us a Visit

More people visit our farms every year, but we wish that you all could come to see just what we are doing in the way of producing better strains and varieties of vegetables and flowers. We know it would convince you that the place to buy seeds is right from the place that they are grown.

On Harris' Seed Farms are grown more vegetable and flower seeds (except beans) than are produced in the rest of the state. Here you can see the growing crops in the fields. Our expert plant breeders will show you our stock plots and explain the methods we use in improving our strains of vegetables. Our trial grounds where we grow sample rows of every lot of seed we sell as well as many new kinds are always interesting. We shall be glad to go over them carefully with you. Many growers have found here just the varieties they want. It will help you to keep up to date on the new and improved vegetables and flowers.

We know that every one cannot visit us, so in our catalogues we have described the varieties we sell carefully, accurately and without exaggeration.

Harris' Seed is priced as low as possible for seed of this high quality, in fact we have never before been able to offer our customers such fine seed at such low prices as we list this year.

Every Lot of Seed is Tested

Not only tested, but the *results* of the *test* are shown on a label which is attached to every package or lot of seed sold. This is information that is not given by other dealers. It has been found of great help to those who use Harris' Seeds. By consulting the label you can tell just how thick to sow the seed so as to get an even stand of plants without using an unnecessary quantity of seed which often causes a great deal of time and labor by thinning.

According to Our Tests
96 per cent
 of this seed germinates

A label like this is put on every lot of Harris' Seeds that are sold. The figures of course vary.

Quick Service

You can be assured when you send us an order that you will not have to wait and wait for your seeds. During the busy season orders are sent out the day after they arrive, and the fast mail, express and freight service we have now will get them to you quickly and in good order.

"We thank you for your promptness heretofore. It helps a lot when we are rushed as we are now."
 Earl R. Cafferty, Cortland, N. Y. April 6, 1931.

"My seeds I got from you are the finest grade and I am more than satisfied. I have been in the garden business nearly 50 years and should be able to know what I am saying." Caleb Marlow, Elgin, Ill. June 8, 1931.

"Have found your seeds to be all you claim for them, very satisfactory." George S. Wasson, Orchard Park, N. Y. Jan. 13, 1931.

Harris' Northern Grown Sweet Corn

It is of great importance to plant seed corn which is grown in the North. Such seed is hardier, more vigorous and earlier than seed grown further south or in the west.

We are located in Western New York near the border of Lake Ontario and all the seed corn we offer on these pages has been grown on our own farm or nearby farms under our most careful supervision. Our careful selection of stock seed combined with the shortness of our growing season make this corn earlier than similar varieties grown farther south. *The wilt known as "Stewart's Disease" is unknown in this vicinity.* Our crops of sweet corn have been exceptionally fine this year, and the seed we offer is the finest we have had in years.

Plant only Harris' Northern Grown Sweet Corn. *It will pay you.*

Whipple's Yellow Sweet Corn

Earlier than Bantam and as large as Evergreen

This is a wonderful early *yellow* corn that has proved very profitable to raise for market. The ears are very large, 8 to 9 inches long, having 12 to 16 rows of deep kernels. They mature ready for use two or three days earlier than Golden Bantam. The quality of the corn is fine, but possibly not quite as sweet as Buttercup.

Its large size and earliness make it a most profitable market variety. The big handsome ears, as yellow as butter, always command the highest prices. The ears are of the same type as Whipple's Early and mature at about the same time.

This variety was introduced by us in 1920 and has become so popular and proved so profitable as a market corn that many other seedsmen are offering inferior strains as Whipple's Yellow. To keep its earliness, size and quality we have used the greatest care in selecting the corn from which to raise seed instead of using the whole crop as is done by most growers. The only safe way is to buy seed direct from headquarters and thus get Northern Grown Seed from our own carefully selected stock. *We do not sell to dealers!*

NOTE—When ordering please write "Whipple's Yellow" not just "Whipple's" as that will confuse it with Whipple's Early which is a white corn.

Price: 6 lbs. \$1.20; 12 lbs. (peck) \$2.05; 100 lbs. \$15.00. 25 lbs. or more at the 100 lb. rate.

"Last year I had some of this same seed (Whipple's Yellow) and had wonderful luck with it." F. S. H. Callaghan, Litchfield, Me. May 8, 1931.

"I have got my seed corn from you since 1918 and it has proved highly satisfactory." Edward White, Elyria, Ohio. Mar. 27, 1931.

Spanish Gold

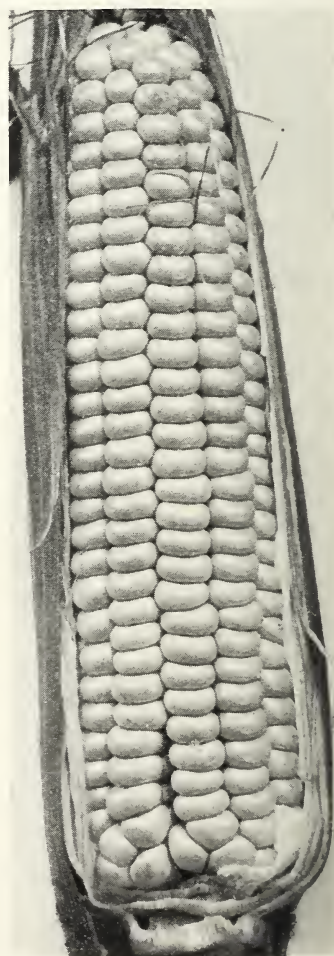

This corn was bred at the Connecticut Agricultural Experiment Station and is considered one of the best early yellow varieties. We obtained our stock seed direct from the station and have grown a crop on Moreton Farm this year. All who saw the corn growing here remarked on the earliness and heavy yield.

This is a very early variety and in our trials this year matured earlier than any other yellow corn except Golden Gem which is the earliest kind we know of.

This is a very vigorous grower for such an early variety, the stalks being of good height and often having two good ears. The ears are 5-6 in. long containing eight to twelve rows of deep yellow corn and fill out right to the tip. This makes a very attractive and readily salable ear. The quality is good but not of the best.

Market Gardeners will find that this is a profitable kind to raise and should by all means plant some this year.

Price: 6 lbs. \$2.00; 12 lbs. (peck) \$3.45; 100 lbs. \$27.00.

Spanish Gold Corn

Harris' Extra Early Bantam Sweet Corn

The Best Extra Early Yellow Corn

This variety introduced by us in 1927 has proved to be very profitable to those growers who have been fortunate enough to raise it. Discriminating growers consider this the best all around Extra Early yellow variety.

This corn is simply a strain of Golden Bantam that is ready for market *ten days before* that variety is ready. With this corn a grower can market Golden Bantam long before others who raise the standard variety have any ready. He can get 40, 50 or even 60 cents per doz. while the old variety when it comes in brings 15 to 25 cents per doz. Think of the difference in the profit from the early strain. The whole crop can be picked and sold before the price gets down to 25 cents per dozen. The extra price is all profit except for the dollar or two more paid for the seed.

The ears of Harris' Extra Early Bantam are usually 7 to 8 inches long and have 8 to 10 rows of yellow kernels. They are just like Golden Bantam in appearance and quality but they mature much earlier. *Seed grown exclusively for us on nearby farms from our own carefully selected Stock Seed.*

Price: 6 lbs. \$1.40; 12 lbs. (peck) \$2.40; 100 lbs. \$18.00. 25 lbs. or more at the 100 lb. rate.

"The Harris' Extra Early Bantam has been a great money maker for us." C. C. West, Bemus Point, N. Y. Feb. 3, 1931.

Golden Gem

The Earliest Sweet Corn

This new yellow corn was introduced a few years ago by the North Dakota Agriculture Experiment Station and has proved to be the earliest sweet corn grown.

The ears are about 6 in. long 8 to 10 rowed, deep yellow in color and of very high quality. When well grown on good land the stalks reach a height of about 5 feet.

Growers who want to be first on the market, and have rich well fertilized ground will do well to grow some of this new variety. It will pay you money to do so. Plant some of this variety in part of your corn ground to get the first early market when prices are high.

Seed of our own growing.

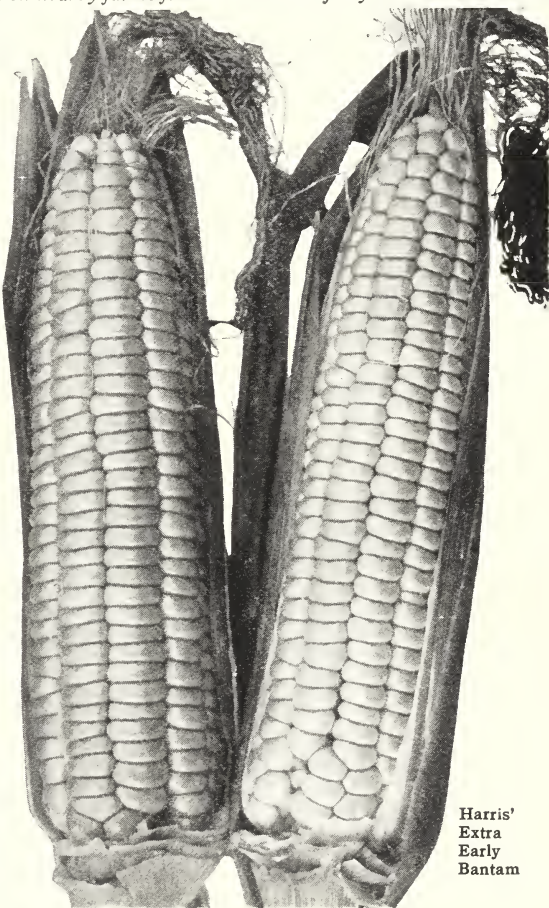

Price: 6 lbs. \$1.80; 12 lbs. (peck) \$3.25; 100 lbs. \$25.00. 25 lbs. or more at the 100 lb. rate.

Golden Sunshine

This is an excellent early yellow variety. The ears are 6-7 in. long and contain 10-12 rows of golden yellow kernels. This corn is very early and matures fully a week before Golden Bantam.

In order to be sure of having a true stock we have grown a crop of this corn under our care on a nearby farm.

Price: 6 lbs. \$1.35; 12 lbs. (peck) \$2.30; 100 lbs. \$17.00. 25 lbs. or more at the 100 lb. rate.

Harris'
Extra
Early
Bantam

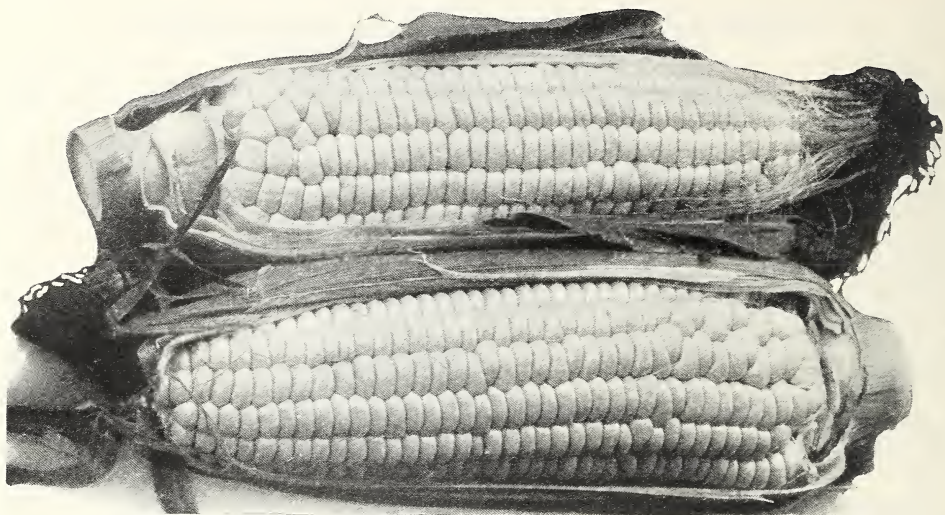

Buttercup—The Sweetest Sweet Corn

The Buttercup is really an improved Golden Bantam with *larger ears*. It always sells better than Golden Bantam. The kernels are as yellow as June butter. The ears are of good length (8 to 10 inches) and have 8 to 10 rows of large kernels of a rich butter yellow. It is medium early, maturing the same time as Golden Bantam, and is more prolific. Many stalks produce two good ears. The Buttercup contains more sugar than any variety we have tried.

For market the Buttercup is a very profitable corn. There is always a good demand for yellow sweet corn of the Golden Bantam type and the large attractive ears of the Buttercup command a premium over smaller kinds.

Seed grown exclusively for us in Monroe County from our own carefully selected stock seed.

Price: \$1.20; 12 lbs. (peck) \$2.05; 100 lbs. \$15.00. 25 lbs. or more at the 100 lb. rate.

Gill's Early Market Sweet Corn

Gill's Early Market—The Earliest White Sweet Corn

Without exception this is the earliest white sweet corn yet produced and is earlier than any other sweet corn we know of except *Golden Gem*. Alpha matures a few days later and has much smaller ears. The Gill's Early Market is not only extremely early but in addition the ears are large, having 12 to 14 rows and often measure 8 inches long. The quality is very good for such an early variety.

This is really a remarkable corn. No very early variety hitherto has been anywhere near the size or quality of this new kind.

This is one of the most profitable varieties a gardener can raise where the market demands a white corn. By planting some of the Gill's Early Market the grower can begin selling corn before any one else and get the cream of the demand and high prices before the market is flooded with the late kinds.

Although not of our own introduction we have raised the Gill's Early Market for several years and have improved it both in earliness and size. The seed we offer is of our own selected stock, Northern grown here in Western New York and of the highest quality.

Price: 6 lbs. \$1.35; 12 lbs. (peck) \$2.30; 100 lbs. \$17.00. 25 lbs. or more at the 100 lb. rate.

Whipple's Early (White)—The Largest Early Sweet Corn

Since we first introduced this corn in 1919 it has gained steadily in popularity. Where a white corn is wanted it is one of the most profitable varieties to raise.

To describe it briefly it is like Stowell's Evergreen in size and shape, but matures *very early*—as early as Golden Bantam and two to three weeks earlier than Evergreen. The quality of the corn is superior to Evergreen, the corn being sweet, tender and delicious. The ears are 7 to 8 inches long and very large around, as they have 14 to 18 rows of good sized kernels. Each ear is filled right out to the tip. The kernels are long and narrow like Evergreen.

A profitable market variety—Where a white corn is in demand, this is one of the most profitable kinds to raise. The ears are large and handsome, the quality so fine and the yield so heavy and above all they mature so *early* that it has proved one of the *most profitable corns ever grown*. It is like having Evergreen corn *two weeks earlier* than other people and getting nearly *twice as many dozen per acre*. The seed we offer of this variety was all grown in Monroe County where "Stewart's Disease" is unknown. Plant only seed of this variety of known origin.

Price: 6 lbs. \$1.20; 12 lbs. (peck) \$2.05; 100 lbs. \$15.00. 25 lbs. or more at the 100 lb. rate.

Mimms' Hybrid

This is one of the best medium late varieties when a white corn is wanted. This corn matures in midseason between early and late varieties and is the best kind of its season.

The ears are 10-12 in. long and have 12-16 rows of kernels, which fill right out to the tip. They are snow white and very tender and sweet. This corn is superior in quality to most white varieties. The yield is heavy, many stalks producing two large handsome ears.

The seed we offer is a fine pedigree strain of our own breeding grown for us exclusively here in Monroe County and will please the most critical gardeners.

Price: 6 lbs. \$1.35; 12 lbs. (peck) \$2.30; 100 lbs. \$17.00. 25 lbs. or more at the 100 lb. rate.

Harris' Special Varieties and Strains of Vegetables

These are varieties which we have introduced or of which we have very finely bred strains that are much superior to the seed usually sold.

New Red Cored Chantenay Carrot

Growers who tried this new "Coreless" Chantenay carrot last year were well pleased with it, many getting higher prices for it than for their ordinary carrots. It is especially valuable for soup makers as the deep orange red color makes a better looking product than can be made from the old strain with a light colored core.

The carrots are just the same as a good strain of Chantenay but with the difference that the deep color extends all through the root so there is no light colored core.

The roots are as long as the Chantenay which is usually sold, averaging 6 in. long, very smooth and symmetrical and of deep orange red color all through.

Our strain will be found exceptionally fine. It is over 90 per cent true coreless, smoother and more uniform than other strains which we have seen.

$\frac{1}{4}$ lb. 40c; lb. \$1.25; 10 lb. \$11.00.

Chantenay Carrot Special Strain

This is at present the most popular carrot for the general market. The roots grow 6 to 7 in. long, taper slightly and are quite square or stump rooted at the bottom. The color is deep orange and the roots are very fine grained and smooth. The stock we offer grows about *one inch longer* than the usual strains of this variety and *is without doubt the finest strain of Chantenay Carrot we have ever seen.*

$\frac{1}{4}$ lb. 30c; lb. \$1.00; 10 lbs. \$7.50.

Red Cored
Chantenay
Carrots

Brussels Sprouts

Long Island Improved-Special Strain

This strain of Brussels Sprouts produces a plant which does not grow very tall but is literally covered with large solid sprouts. In our trials we have found no strain which will equal it for uniform size of sprouts and large production. Market growers find that Harris' Strain is the most profitable to grow. Oz. 60c; $\frac{1}{4}$ lb. \$1.90; lb. \$6.50.

Harris' Special Crosby's Egyptian Beet

The Finest Beet For Market

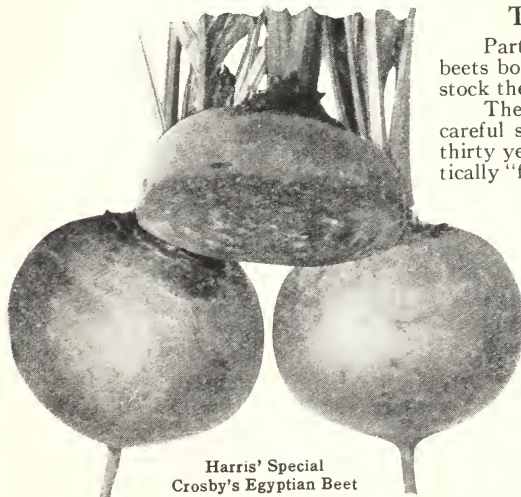

Particular gardeners who want the *very finest* beets both in shape and color will find this special stock the best obtainable.

The seed is of our own growing and the most careful selection has been practiced for more than thirty years until now we have a strain that is practically "fixed" so that the beets come all alike, nearly every one a model for shape and color.

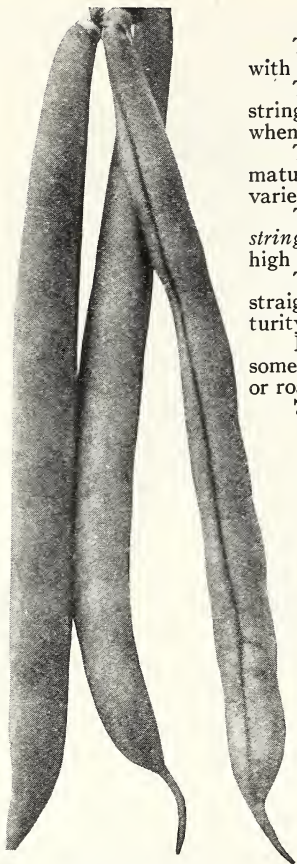

The beets are of globe shape, very deep red, perfectly smooth and with very small tap roots. The tops are unusually small. This beet grows very rapidly and is ready for market as early as any other kind we know of. It is much earlier than Detroit Dark Red and Early Blood Turnip. It is just as early as Early Wonder and grows more uniform in shape and color.

This is the finest strain of Crosby's Egyptian beet obtainable no matter what price is charged for the seed.

$\frac{1}{4}$ lb. 40c; lb. \$1.15; 10 lbs. or more at \$1.00 per lb.

Harris' Special
Crosby's Egyptian Beet

Tendergreen Beans

Tendergreen Bean

This new variety has proved to be one of the very best green beans with round pods.

The pods are long, rather slender, light green, round as a pencil, stringless and of very high quality, being unusually tender and delicious when cooked.

The vines are very vigorous, strong and productive. The pods mature about the same time as Black Valentine and much resemble that variety in appearance but are far superior in quality.

The Tendergreen is what we have long been looking for—a round *stringless* bean early in production and handsome in appearance and of high quality and yield.

The combination of *high quality*, the heavy yield of handsome, long straight light green pods, the strong growth of the plant and early maturity will place this bean among the very best in its class.

Market gardeners find it a very profitable bean to grow. The handsome appearance and fine quality make it a ready seller in any market or roadside stand.

7½ lbs. \$1.80; 15 lbs. \$3.30; 60 lbs. (bu.) \$12.00.; 100 lbs. \$20.00.

Harris' Special Detroit Dark Red Beet

The Detroit beet is used more extensively for canning than any other variety. The beets are perfectly round or globe shaped, have small tops and slender tap roots. The color is deep red with but faintly defined rings which disappear entirely when the beet is cooked. The quality is exceptionally fine, the young beets being very sweet and without toughness.

Our special strain produces beets that are much more uniform in shape and color than the strains usually sold. We can confidently state that there is no better strain to be obtained at any price.

¼ lb. 30c; lb. 95c; 10 lbs. or more 85c per lb.

Bountiful Beans

One of the earliest flat dwarf green podded beans. The pods are long, straight and entirely stringless. The vines are extremely productive and this variety has proven a most profitable kind for market growers. We offer our own special stock of Northern Grown seed from disease free fields. *There is no better stock obtainable.*

7½ lbs. \$1.50; 15 lbs. \$2.70; 60 lbs. (bu.) \$9.60; 100 lbs. \$16.00.

BROCCOLI

Italian Green Sprouting (Calabrese)

This vegetable has become very popular and a profitable crop to grow. It produces a central head which when cut out allows side sprouts to grow up and head. These heads are also cut, allowing a third crop of sprouts to grow out and head. The heads are deep green when ready to use.

The culture of Broccoli is the same as cauliflower and as several cuttings can be made from each plant it is a money making crop.

Market gardeners will find this a very easy vegetable to grow and one that commands the highest prices on the market.

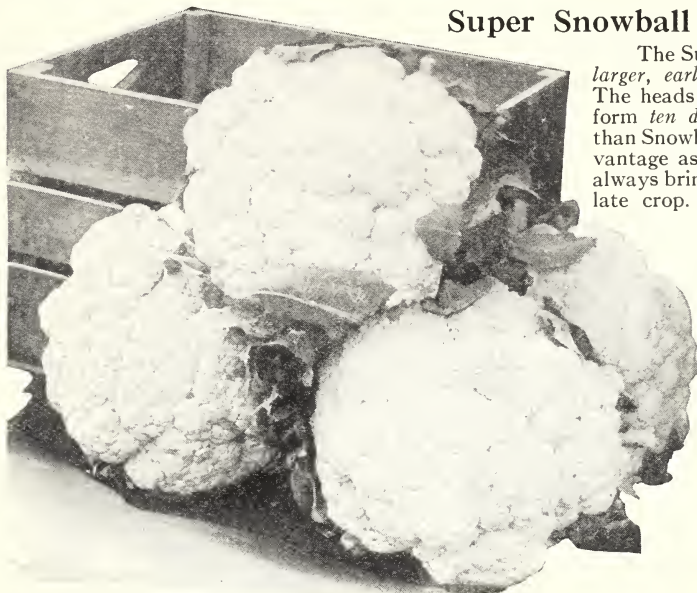

Our seed is of the true Italian Calabrese strain producing large compact heads. We have tried many different varieties and strains of Broccoli in order to find the most desirable kind.

Price: ¼ oz. 25c; oz. 75c; ¼ lb. \$2.15; lb. \$7.50.

Italian Green Sprouting Broccoli

Super Snowball Cauliflower

Super Snowball Cauliflower

The Super Snowball is simply a larger, earlier and better Snowball. The heads are very large and they form ten days to two weeks earlier than Snowball. This is a distinct advantage as early cauliflower nearly always brings higher prices than the late crop. Super Snowball heads very uniformly. 90 per cent of the plants produce fine large heads within two weeks from the time the first heads mature.

The plants are very strong and vigorous, having large, distinctly characteristic leaves which are somewhat blistered and curl over the head to give protection from the sun.

We regard this as the most pronounced improvement made in cauliflower in many years and many gardeners have found it a very

profitable kind to raise. A word of caution is necessary, however. The heads of this variety, as we have said, mature nearly at the same time. Should the weather condition just at this time be favorable, a wonderful crop of large handsome heads will result. But if the weather happens to be unfavorable when the heads form, a larger part of the crop will be affected than would be the case with another variety which matured over a longer period of time. For this reason it is well not to depend entirely on one strain. We therefore advise using Super Snowball for part of the acreage and Snowball or Erfurt Early Dwarf for the balance.

$\frac{1}{4}$ oz. \$1.00; oz. \$3.25; $\frac{1}{4}$ lb. \$11.00; lb. \$40.00.

"Your Super Snowball cauliflower proved to be the largest, best heading and most satisfactory of any cauliflower we planted this year." R. M. Strange, Taunton, Mass. Nov. 16, 1931.

Snowball Cauliflower—Perfected Strain

This is the variety which is most generally grown as the main crop cauliflower. Our Perfected strain is the finest of this kind which we know of. The plant is dwarf and compact, the heads are large, solid and compact, snow white and with no protruding leaves when grown under average conditions.

We can confidently state that seed we offer is the finest strain obtainable and there is no use paying more than we charge as no better can be bought at any price.

Price: $\frac{1}{4}$ oz. 65c; oz. \$2.00; $\frac{1}{4}$ lb. \$6.75; lb. \$25.00.

Golden Acre Cabbage Special Strain

We are now able to offer a special strain of the well-known Golden Acre cabbage which is much more uniform in shape, size and time of maturity than any we have had heretofore. This strain has been bred so that practically all the heads are round, very compact, just alike and mature all at the same time. The plant has but few outside leaves and the heads form very early so the crop can be harvested before any other kinds are ready.

Growers will find this special strain a profitable one to use.

Golden Acre Special. Oz. \$1.00;
 $\frac{1}{4}$ lb. \$3.40; lb. \$12.00.

Golden Acre Cabbage

Golden Plume or Wonderful Celery

We have a very superior strain of this popular celery which is now rapidly taking the place of other varieties. We consider this the finest all around celery of the "blanching" type in existence. The stalks of our special strain are *very large* with remarkably *heavy hearts* and with *thick solid stems, unusually long* between the root and first joint. See photograph on Front Cover. There is not one green stalk in a thousand and no soft ones. This strain is quite *blight-resistant*. Often where other kinds are badly affected with blight or rust this strain of Golden Plume will be found in the same field perfectly healthy and entirely free from blight.

The seed we offer is "*proved*." That is a crop of celery has been raised from it so we *know* just what it produces. We have never seen better celery than the crops produced from this strain.

The seed is of strong germination and we can confidently recommend it. There is no finer strain obtainable *at any price*.

Oz. \$1.25; $\frac{1}{4}$ lb. \$4.25; lb. \$15.00.

"Could you supply me with Golden Plume celery seed that will produce as good a crop as I had from your seed this year? It certainly was wonderful—. In fact it was 100% better crop than was produced from your competitors' seed." Howard Carrothers, Thedford, Ontario, Canada. Mar. 1, 1930.

A New Green Celery Salt Lake

This new green celery is just what we have long been looking for—an almost perfect green celery for winter storage. Growers who have had it the last two years have been very enthusiastic about it as it supplies a long felt need for a fine green celery.

The plant grows to a good height, not too tall, and makes a well developed and heavy heart. The individual stalks are *very thick, crisp* and of high quality. They blanch more quickly than other green varieties. In one field we examined several thousand heads as they were being dug but could not find a soft one.

We highly recommend this new celery for winter use and storage. We are sure growers will find it a profitable variety to raise.

Oz. 75c; $\frac{1}{4}$ lb. \$2.35; lb. \$8.00.

Salt Lake Celery

Sugar Rock Muskmelon

Sugar Rock Muskmelon Sometimes called "Honey Rock"

We have been favorably impressed with this new melon which is so popular on many markets.

We have never eaten a melon of finer quality and every one of them as of high flavor which can be said of very few other varieties. The melons are of very light green, almost perfectly round and are covered uniformly with coarse netting. The flesh is of deep orange color, quite firm and of delicious sweetness and very high flavor.

The fruit has a hard shell and will stand shipping well. They are very uniform in size, being 4 to 5 in. in diameter and 5 to 6 in. long. We offer a fine true strain.

On account of its exceptionally high quality and handsome appearance this melon has proved a profitable variety, where a melon of medium size is wanted.

Oz. 30c; $\frac{1}{4}$ lb. 85c; lb. \$2.75; 10 lbs. \$25.00.

Harris' Double Yield Pickle

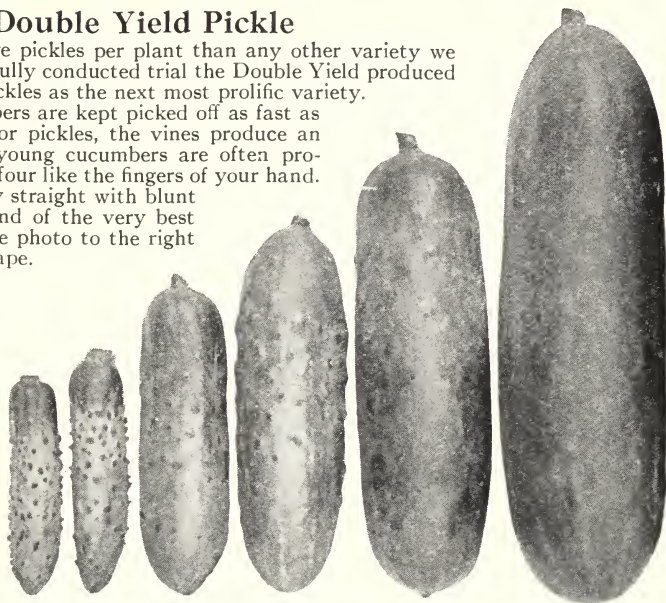

This variety yields more pickles per plant than any other variety we have ever grown. In a carefully conducted trial the Double Yield produced *three times* as many small pickles as the next most prolific variety.

When the small cucumbers are kept picked off as fast as they get to the right size for pickles, the vines produce an astonishing number. The young cucumbers are often produced in clusters of three or four like the fingers of your hand.

The cucumbers are very straight with blunt ends, medium deep green and of the very best shape for small pickles. The photo to the right gives a good idea of the shape.

The Earliest Cucumber. Harris' Double Yield is not only much more prolific than other kinds but is also *earlier*. These cucumbers mature two weeks before other kinds are ready. On this account many gardeners find it profitable to grow as a market variety for slicing. The fruit is 5 to 6 inches long when ready for slicing.

Price: $\frac{1}{4}$ lb. 40c;
lb. \$1.25; 10 lbs. \$11.50.

Harris' Double Yield Pickles

(Note the uniform shape at the different stages of growth)

Dandelion

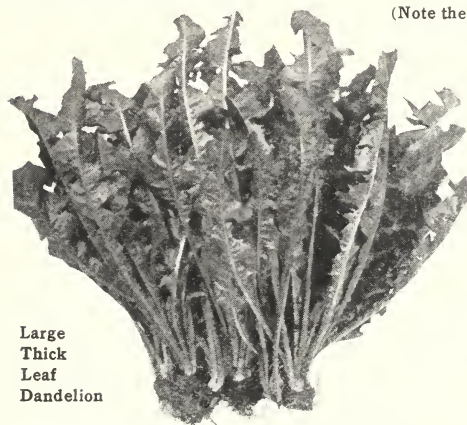

Large Thick Leaf-Special Strain

We obtained the stock for this strain from the late Franklin Wyman of Arlington, Mass., who was so successful in developing fine strains of vegetables and have grown a crop of seed from carefully selected plants on our own farm. The seed is of high germination and will produce large stocky thick leaved plants.

Oz. 55c; $\frac{1}{4}$ lb. \$1.65; lb. \$5.50.

"Seeds got from you last season were fine. EXTRA EARLY BANTAM and GILL'S EARLY MARKET proved extra early here and met with great favor. W. P. Van Vert, Bemus Point, N. Y. May 20, 1931."

See description of these two varieties on pages 3 and 4.

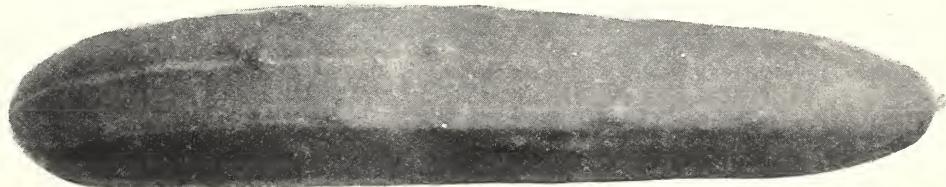

Large
Thick
Leaf
Dandelion

Longfellow Cucumber

Those who want a *long, slender very dark green* cucumber will find the Longfellow a very satisfactory variety. The fruit when ready to use is 9 to 10 in. long and 2 in. in diameter. When nearly fully matured the cucumbers are often 12 to 14 in. long.

This variety closely resembles hot house cucumbers and always sells for the highest prices. Compared with Early Fortune, Harris' Perfection and Davis Perfect, the Longfellow is longer, more slender and of deeper green color. The vines are vigorous and quite productive.

Oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00; 10 lbs. \$19.00.

Longfellow Cucumber

White Boston Lettuce

We are now able to offer a very fine strain of this excellent lettuce which heads with almost perfect uniformity, forming very compact light green heads blanching creamy white inside and with no purple or pink tinge on the outer leaves. The heads are similar to Big Boston but are lighter green and have no red tinge and they mature earlier.

More of this lettuce is being planted each year. Muck land growers in increasingly large numbers find this variety a very profitable kind to grow for part of their lettuce crop.

Our strain of this variety is the very best that money can buy. *It is fully equal to any strain obtainable even at twice or three times the price we charge for the seed.* You cannot get better seed no matter what you pay for it. Try it and see. Oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.75; 10 lbs. \$16.50.

From one half acre each of your Big Boston and White Boston lettuce, we harvested 585 boxes of Big Boston and 605 boxes of White Boston. Both of these varieties passed the G. O. Brand inspection test of the Genesee, Orleans Veg. Growers Co-op. Assn. Winsinger and Chapell, Byron, N. Y. July 28, 1931.

White Boston Lettuce

"California Iceberg" Lettuce—Can Now be Raised in the East!

We are now able to offer a new strain of New York or Wonderful lettuce which matures earlier than the old strain and is better adapted to growing conditions in the eastern states. The strain is called New York No. 12. If given proper culture the strain will produce large, firm heads almost perfectly round and which mature 10 days earlier than the old strain, and head much better under eastern conditions.

There are several ways of getting good results from this type of lettuce. The seed can be sown under glass and the plants set out early in the open ground. Another way is to sow the seed in July so the lettuce will head in the fall when the weather is cool. Overhead irrigation is of great benefit to this crop. No lettuce of this type does well on muck land.

New York No. 12 Lettuce. Oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50; 10 lbs. \$24.00.

ROADSIDE MARKETING—Gilbert S. Watts

All who grow vegetables for the roadside trade should have this book. It contains many practical suggestions drawn from the author's experience in conducting a successful wayside market. (128 pages). Illustrated. \$1.25 postpaid.

Mammoth Podded Extra Early Peas

A new large podded very early pea which has proved a very profitable market variety. It matures only a day or two after Alaska and First and Best and the pods are much larger (see illustration to the right) being 4 in. long and the yield is therefore much larger. The vines are strong and very productive. This pea is hardy and can be sown as soon as the frost is out of the ground. We are sure growers will find this one of the most profitable early peas to grow.

7½ lbs. \$1.75; 15 lbs. \$3.00; 56 lbs. (bu.) \$10.08; 100 lbs. \$18.00.

"Have raised peas for 23 years and have never had anything like your Mammoth Podded Extra Early. They beat them all. Started picking June 11th.... Delbert" Bungart, Birmingham, Mich. June 14, 1931.

Laxton's Progress Peas

This pea is the largest and best of the medium early dwarf varieties. It resembles Hundredfold but the pods are larger and it matures a little earlier.

The vines grow 15 to 18 in. high and are covered with an abundance of large deep green pods 4 to 4½ in. in length. The peas ripen so uniformly that ordinarily two pickings will clean up the crop. The yield is large and the big handsome well filled pods find a ready sale making this variety a most profitable kind to grow.

Price: 7½ lbs. \$1.75; 15 lbs. \$2.85; 56 lbs. (bu.) \$9.52; 100 lbs. \$17.00.

Photo showing relative size of Mammoth Podded Extra Early (right) and First and Best (left)

Over 1000 Bushels per Acre

This 12 acre field of Ohio Yellow Globe Onions, Harris' Strain, yielded over 1000 bushels of U. S. No. 1 onions per acre.

Ohio Yellow Globe Onion—Harris' Strain

For consistent large yields of fine onions on muck land you cannot beat the Harris' Strain of Ohio Yellow Globe onion. The onions grow to a large size, are of deep yellow color and globe shaped except a slight flattening on the bottom. The onions mature the same time as Yellow Globe Danvers and a week earlier than Southport Yellow Globe.

Many large growers recognize the fact that it pays them to plant only this strain as we have an exceptionally fine strain of this variety.

$\frac{1}{4}$ lb. 45c; lb. \$1.50; 10 lbs. or more \$1.40 per lb.

Golden Phenomenal Celery

This is the largest strain of Golden Self Blanching celery yet produced. It resembles Golden Plume but is a little larger and the stalks are longer from the first to the second joints. It forms a very heavy stalk with full well-developed heart.

With this variety the largest and finest celery can be produced. Such celery always commands a premium in price over smaller stock. Except for its larger size this new celery is the same as Golden Plume and the old strain of Golden Self Blanching and retains the good qualities of these well known varieties.

The seed we offer was grown for us by the originator and is *proved seed* from which a crop has been grown.

$\frac{1}{4}$ oz. 65c; oz. \$1.60; $\frac{1}{4}$ lb. \$5.75; lb. \$20.00.

"I take pleasure in submitting a photo of the largest bunch of celery every grown on the Ross Farm and perhaps in our County. 12 Stalks trimmed weighed 52 lbs. We had many others that weighed between forty and fifty lbs. The variety is your Golden Phenomenal. The price received ranged from 80c to \$1.40 per dozen according to weight. The young lady in the photo, my niece, is our sales lady in our market house." P. A. Ross, Bradford, Pa. Sept. 19, 1931.

Mountain Danvers Onion

A very early maturing strain of Yellow Globe onion originating in the mountains of Colorado. The onions are of fine globe shape, deep yellow color and very firm. They ripen *two or three weeks earlier* than Yellow Globe Danvers, and are valuable on this account where the seasons are short. These onions have remarkable keeping qualities and can be safely stored all winter. They do not get quite as large as the Yellow Globe Danvers, but are of good size and are often found more profitably than the later kinds because they can be marketed before other kinds are ready. *Muck growers find it profitable to plant a portion of their onion acreage in Mountain Danvers.*

Price: $\frac{1}{4}$ lb. 50c; lb. \$1.60; 10 lbs. \$15.00.

"I have the finest lot of onions in my locality which I give your seeds credit for." Charles Hamann, Climax, N. Y. June 17, 1931.

"Several growers near here who bought small quantities of your seeds from me last season have expressed a desire to plant them on a larger scale this year. The party for whom I ordered 40 pounds of Mountain Danvers onion seed harvested in excess of 400 bu. per acre which was very good considering the dry season." C. H. Harnden, Saginaw, Mich. Jan. 9, 1931.

Mountain Danvers

Bender's Surprise Muskmelon

Harris' Special Strain

A Grand Melon for Both Shipping and the Home Market

We believe there is no muskmelon quite equal to the Bender for fine flavor, size and keeping qualities combined.

The melons are round to oval in shape, ribbed and covered with coarse netting. The flesh is very thick, especially so at the blossom end so that the melons rarely crack.

When ripe the melons turn a golden tint which shows through the netting and gives the fruit a very attractive appearance.

The size of the melons averages quite large, many weighing 10 lbs. and more. We have had melons that weighed 16 pounds.

A valuable point about these melons is that they will keep in good condition five or six days after picking, and actually improve in flavor during that time. The flesh is so firm and thick that the melons remain firm and in good condition much longer than other large melons of this class. For market and shipping this is an important consideration.

We have bred the Harris' Strain of Bender melon on our own farms for over ten years, paying special attention to high quality and trueness to type, so that the Harris' Strain is much superior to ordinary strains of this variety. Our crop this year was the finest we have ever had.

Seed of our own growing: Oz. 30c; ¼ lb. 85c; 1b. \$2.75; 10 lbs. \$25.00.

"The Benders I raised last year from your seed went to the best hotel in the County." Bixby Bros., Sunderland, Mass. Feb. 28, 1931.

"I had good luck with the melon seeds purchased of you last season and found the Bender seed 100% pure." C. L. Luce, Dunkirk, N. Y. Apr. 14, 1931.

Bender's Surprise Muskmelon

Riverside Sweet Spanish Onion

Riverside Sweet Spanish Onion

This is the largest onion we have ever raised. From our experience with it we cannot see why these immense yellow Spanish onions cannot be raised in this country. During the past two years these onions have done better and have been more resistant to disease and insect pests than any variety in our trials.

The onions are of almost perfect globe shape, slightly flattened at the ends, and of a clear bright yellow. The flesh is of a very mild, pleasant flavor.

In our own grounds these onions matured as early as Prizetaker and only a little later than Southport Yellow Globe while the onions are *twice the size* being often four inches through and weighing a pound or more. These were raised from seed sown in the open ground and the plants thinned to stand 2 or 3 in. apart.

Sow early on good rich soil, top dress with nitrate of soda and you will have a wonderful crop of big handsome onions that should sell at high prices.

Oz. 30c; ¼ lb. 85c; 1b. \$2.75; 10 lbs. \$26.00.

"We have been using Harris' Seeds for more than 20 years and are still going strong." Fred Peck & Sons, Saratoga Springs, N. Y. Mar. 6, 1931.

Harris' Model Parsnip

We have been improving the old Hollow Crown parsnip by careful selection for many years until we have obtained a very fine strain which we call "Harris' Model."

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance.

Our seed is of our own growing from transplanted and very carefully selected roots and it will be found far superior to the seed usually sold.

Oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.10; 10 lbs. \$10.00.

"Have tried your Model Parsnip and they came out OK." K. Berthold, Saugus, Mass. Jan. 23, 1931.

Transplanting Model Parsnips for seed at Moreton Farm

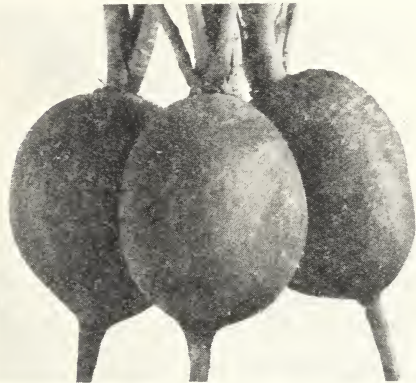

Early Scarlet Globe Radish Special Strain

Best for Forcing or Open Ground

We can confidently state that our strain of this popular radish is as good if not better for both outdoor and greenhouse growing than any strain in the market today. This strain is the true olive shape, of an attractive bright red color, early and very uniform in maturity and with medium small tops. Our seed is all grown from transplanted roots. The seed is very vigorous and of high vitality which is of utmost importance to the greenhouse grower.

$\frac{1}{4}$ lb. 25c; lb. 70c; 10 lbs. \$6.50; 100 lbs. \$60.00.

NOTE: To growers who are interested we will be glad to furnish germination figures before they buy their seed.

Early Scarlet Globe—Special Strain

"This Early Scarlet Globe Seed has come up the best of any Radish seed I have bought for a good many years." W. J. Goldwaithe, Dunstable, Mass. May 12, 1931.

Delicious The Sweetest Early Muskmelon

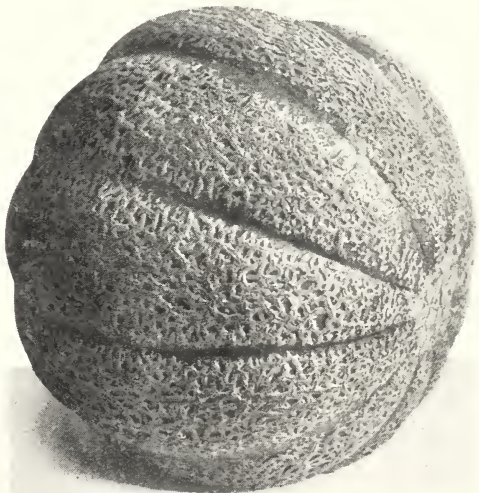

This is the *earliest* large melon of high quality we have ever raised. In our trials the past season the Delicious was nearly as early as Golden Champlain and much earlier than Emerald Gem, while the melons were much larger and of higher quality than either of these varieties.

The melons are of oval shape, light green with close, fine netting. The flesh is of deep orange color, very sweet and of high flavor.

We highly recommend this melon for the home garden and home market. The flesh is rather too soft for long distance shipping but its sprightly flavor and delicious sweetness will always be appreciated in the nearby markets.

The seed we offer is of our growing here on Moreton Farm. It is a very fine true stock and will produce melons of uniform size and the finest quality.

Oz. 50c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50.

Delicious Muskmelon

Harris' Early Giant Pepper

The Earliest and Most Prolific Large Pepper

By careful breeding methods extending over a number of years we have developed this very large pepper that is not only early but yields a large number of peppers on every plant. Hitherto all large peppers have been late and did not yield well in the North.

Harris' Early Giant has fruit that stands 4½ in. high and 4 in. across. *21 peppers fill a 14 qt. basket and 45 completely fill a bushel crate.* It is larger than Ruby King and Giant Crimson and fully as large as Chinese Giant and three or four weeks earlier and much more prolific.

On a great many plants there are 10 to 12 large peppers and 8 or 10 smaller ones at one time, the yield is therefore, immense.

The plants grow 18 in. to 2 ft. tall and produce such a large number of peppers that there is hardly room for them on the plant. The peppers are deep green turning to a brilliant red. The flesh is thick and of a very sweet pleasant flavor. Harris' Early Giant is only a week later than Harris' Earliest, the earliest pepper grown.

Get seed from the originator. One reason why this pepper is so early and prolific is because the seed is raised in the North where the seasons are short. To be sure you are getting northern grown seed get it from headquarters.

Seed of our own growing: Oz. 65c; ¼ lb. \$2.10; lb. \$7.00.

"Your Harris' Early Giant pepper is the finest and heaviest yielding pepper that we have ever grown. Most all of the plants averaged twenty-five to thirty large peppers." Rand & Christensen, Wilson, Conn. Oct. 30, 1931.

Harris' Early Giant Pepper

California Wonder—Thick Meated Pepper

This new variety has attained great popularity because of the thickness of its flesh and the large size of the peppers. California Wonder has the thickest flesh of any large pepper we have ever seen. The peppers are large often 5 in. long by 3 in. in diameter with extremely thick flesh of fine quality. These peppers mature medium early and under good growing conditions produce large crops.

Market gardeners in many sections have found it pays to grow some of this variety. The seed we offer is of a very fine strain and will produce large peppers of the true type.

Oz. 60c; ¼ lb. \$1.90; lb. \$6.50.

Blight-Resistant Savoy Spinach—For Fall Sowing

Our Fall Spinach Trials showing how BLIGHT-RESISTANT SAVOY stands without blighting. The two middle rows are Blight-Resistant. Picture taken in October.

Lb. 30c; 10 lbs. \$2.25; 100 lbs. \$20.00. 25 lbs. or more furnished at 100 lb. rate.

We recommend this variety very highly for the fall crop. Because of its blight-resistant qualities, it will yield large crops of very fine deep colored, heavily curled spinach in the fall, when other varieties are often a complete failure on account of blight. For spring sowing when blight does not ordinarily affect spinach we do not recommend this variety, as it will not stand at that time without bolting as well as some of the other kinds.

Long Standing Bloomsdale Spinach

The Best for Spring Sowing

Long Standing Bloomsdale Spinach

true type with very large crumpled leaves of deep green color and we highly recommend it to all who grow spinach for home use or market.

Lb. 30c; 10 lbs. \$2.35; 100 lbs. \$21.00. 25 lbs. or more furnished at the 100 lb. rate.

Nobel Giant Leaved Spinach

This new spinach grows very rapidly and attains a large size *very early*. The yield is consequently large and the fact that it is produced *very early* makes this one of the most profitable varieties for spring sowing. The plants stand well without bolting. The leaves are of the *largest size*, nearly smooth, thick and quite deep green. We advise gardeners to try this new variety. We are sure it will prove profitable.

Lb. 30c; 10 lbs. \$2.45; 100 lbs. \$22.00. 25 lbs. or more furnished at the 100 lb. rate.

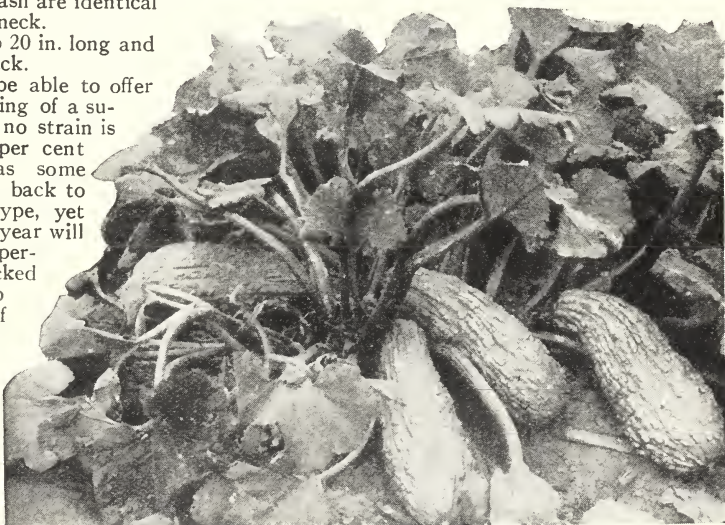

Giant Summer Straightneck Squash

The Straightneck squash is replacing the old Crookneck with many growers because the squash are much more easily handled and a larger number can be put in a crate. Aside from the straight neck, the squash are identical with the Giant Crookneck.

The fruit is 15 to 20 in. long and with a thick meaty neck.

We are glad to be able to offer seed of our own growing of a superior strain. While no strain is as yet one hundred per cent true Straightneck, as some fruits will still revert back to the old Crookneck type, yet the seed we offer this year will produce a very high percentage of straight necked squash. Those who saw the crop of Straightneck growing for seed on our farm this year declared it was the **most uniform strain they had ever seen.**

Seed of Our own Growing
¼ lb. 75c; lb. \$2.50;
10 lbs. \$22.50.

Giant Summer Straightneck Squash

"I grew your Giant Straightneck Squash this year and found it very satisfactory." Edward F. Caldon, Agawam, Mass.

This new spinach has proved to be of great value and has rapidly become the most popular spinach grown today. It grows quickly, forming large deep green leaves which are much curled and blistered.

It is like the best type of the old Norfolk Savoy or Bloomsdale, but is larger and darker green and stands fully a week longer without running to seed.

This spinach is one of the very best early varieties for spring sowing, and is also excellent for fall sowing for early spring use as it is very hardy. Our seed of this variety is exceptionally well bred, every plant being of the

TOMATOES

Harris' Northern Grown Pedigree Strains

We have for years made a specialty of growing tomato seed of the best possible quality here in the North on Moreton Farm. Since we are practically the only large grower of tomato seed in New York State we do not have a certification service and cannot offer "Certified Tomato Seed," but the seed we offer here was all grown from pedigree stocks and saved from disease free fields on our own farm. This seed will be found equal to any and far superior to most that is usually sold. *We grow tomatoes for seed purposes only!* It costs more to grow tomato seed here in the North but the seed is worth much more.

Pritchard's Scarlet Topper Tomato (New)

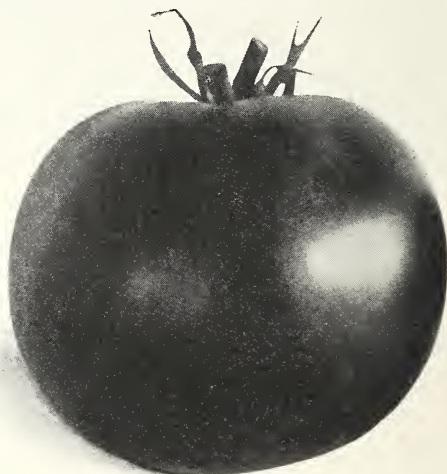

This new tomato is the last introduction of the late Dr. Pritchard of the United States Dept. of Agriculture who originated such varieties as Marglobe and Break O'Day, and it was considered by him to be the best of them all. We believe this to be the best of the many new tomatoes which have been brought out in the last few years.

The fruit is medium early, ripening right after Bonny Best, brilliant red in color, very thick of flesh and colors right up to the stem. This variety is free from cracks which gives the grower a large percentage of No. 1 fruit. The quality is extra fine being mild and without acidity.

The plants are robust but not of rank growth and bear heavily.

We believe that Market Gardeners will find this variety will sell readily and prove a very profitable one to raise.

¼ oz. 65c; Oz. \$2.00; ¼ lb. \$6.00; lb. \$20.00.

Scarlet Topper Tomato

NOTE—Because of the sturdy compact growth of the Scarlet Topper, the plants can be set closer together, assuring a heavier yield of the earliest fruit.

Earliana Tomato—Harris' Extra Early Strain

We are quite sure that all our customers who have raised our special strain of Earliana tomato will agree with us that it is the *smoothest* and *best colored* stock of Earliana obtainable. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier and most of them are irregular in shape and not colored well.

This special strain of Earliana is not only extremely early, but the fruit is *perfectly smooth*, very solid and firm and is well colored right up to the stem.

Gardeners find this a most profitable tomato to raise. The early crop brings high prices and the fruit that ripens later is of such good shape and color that it brings almost as much as the later varieties.

We offer seed of *our own growing at Moreton Farm*. It is *Northern grown* as we are on the north border near Lake Ontario. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

Bonny Best Tomato—Harris' Special Strain

This magnificent early variety should be largely planted. It is only a week later than Earliana and the plants produce enormous crops. The tomatoes are large and smooth as an apple and of a deep scarlet color, which extends right up to the stem. There is no trace of green tinge. There are practically no rough specimens and the fruit does not often crack. This is one of the best tomatoes for market and home use. We are sure there is no finer strain of Bonny Best than the seed we are offering. This is of our own growing from carefully selected plants, and will be found of the highest quality, producing the smoothest and most perfect fruit. No better seed of this variety can be bought at any price.

Seed of our own growing. Oz. 50c; ¼ lb. \$1.45; lb. \$4.75.

"I have raised tomatoes for many years and have found your strain of Bonny Best the finest Bonny Best I have ever tried."
W. E. Breaseale, New Brunswick, N. Y. Mar. 9, 1931.

Canadian Tomato

We have grown and carefully selected this improved strain of Earliana which originated in Canada. From reports of growers and our own observation we are confident that this is the best all around early tomato where earliness, smoothness, color, size and yield are considered.

The fruit is perfectly smooth and well colored right up to the stem. It is as early as Earliana and slightly larger, yields enormous crops and the fruit is smoother and better colored than any other tomato of this class. We have a very fine strain of our own growing which we can highly recommend.

Oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00.

I used your Canadian Tomato last year and had wonderful success. C. A. Clark, Monroe, Me. Feb. 20, 1931.

John Baer Tomato—Improved Strain

We have improved our stock of John Baer so that it is now even better than when first introduced.

The fruit is large, smooth, deep red and colors right up to the stem. The vines are vigorous and healthy and produce heavy crops, the yield being as great as any variety we raise.

We regard this variety as *one of the best medium early tomatoes for market or canning.*

Seed of our own growing from very choice fruit. We have never seen a better crop of tomatoes than our seed crop of Baer was this year.

Oz. 50c; $\frac{1}{4}$ lb. \$1.45; lb. \$4.75.

Harris' Success Tomato

This is one of the finest tomatoes which we know of.

The fruit is practically perfect—large, well colored, smooth, firm, and of exceptionally fine quality, being quite free from acidity when cooked. In addition it yields enormous crops, more than any other kind we raise. Ripens almost as early as John Baer and Bonny Best and is larger, more solid and yields more. Market gardeners will find this one of the most profitable main crop varieties to grow. We do not know of any kind that yields such large crops of smooth handsome fruit. Seed of our own growing. Oz. 50c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50.

Harris' Early STONE Tomato

The Stone has been considered for many years one of the very best tomatoes on account of its firmness and lack of acidity. The only objection to it was the fact that it ripened late. By raising the seed in this northern latitude and making selections with special reference to earliness we have obtained a strain that ripens *almost as early as Bonny Best and John Baer* and at the same time has retained its other good qualities. For canning it is important to get a variety that is not acid and for this reason the Stone is especially valuable for this purpose. The fruit is smooth deep red, solid, firm and very sweet. The yield is high and market gardeners with a discriminating trade will find this a very profitable tomato to raise.

Seed of our own growing. Oz. 50c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50.

Marglobe Tomato

Blight Resistant

This blight resistant variety originated by Dr. Pritchard of the U. S. Department of Agriculture has been found valuable for canning, market and shipping. The fruit is large, globe shaped, perfectly smooth, deep red, very solid and firm. The vines are vigorous and healthy and do not blight. Because of this fact the vines remain green until frost or until the whole crop is matured, so the late fruit is as good as the first to ripen.

This is not an early variety but matures a little earlier than Stone. It is especially valuable where the seasons are long.

We have a very fine strain of this variety.

Seed of our own growing. Oz. 50c; $\frac{1}{4}$ lb. \$1.45; lb. \$4.75.

Marglobe Tomato

General Wholesale Price List

The prices here quoted apply only to orders from market growers, florists and institutions, who use seeds in considerable quantities. For prices of seeds in quantities less than listed here please refer to our general catalogue.

This is NOT A COMPLETE CATALOGUE and does not include field seeds, grass seeds, etc., nor all the varieties of vegetables and flower seeds and plants which we sell. For these see our general catalogue which is mailed in January of each year.

Fagiolì (It.)

Dwarf Wax Varieties

Webber Wax with flat pods is the earliest yellow variety. Sure Crop Wax has long flat pods. Unrivalled Wax is very prolific and has handsome flat yellow pods of good length. Pencil Pod Black Wax is one of the best wax beans with round pods. Refugee Wax is late and has round pods of the highest quality. It is largely used for canning.

Note—30 lbs. or more of one variety will be sold at the 100 lb. rate. A pound is a pint, 15 lbs. a peck, 60 lbs. a bushel. For prices of beans in quantities of less than 7½ lbs. see our general catalogue.

	(Bu.)			
	7½ lb.	15 lb.	60 lb.	100 lb.
SURE CROP WAX. The Best Flat Wax Bean.....	\$1.65	\$3.00	\$10.80	\$18.00
Pods 5 to 6 in. long, flat, bright yellow stringless and rust-resistant. One of the best flat podded wax beans and a profitable market variety.				

WEBBER WAX or "Cracker Jack".....	1.50	2.70	9.60	16.00
The earliest wax bean. The pods are long, straight, flat, stringless and quite free from rust. A heavy bearer.				

WARDWELL'S KIDNEY WAX.....	1.60	2.85	10.20	17.00
Very long, flat, deep yellow pods. One of the earliest and most prolific wax beans for market.				

BURPEE'S NEW KIDNEY WAX.....	1.65	3.00	10.80	18.00
Has narrower and thicker pods than Wardwell's.				

ROUND POD KIDNEY WAX.....	1.65	3.00	10.80	18.00
Pods 5 to 6 in. long, round, clear yellow and stringless, medium early and fairly prolific.				

BRITTLE WAX.....	1.65	3.00	10.80	18.00
Same as Round Pod Kidney Wax.				

PENCIL POD BLACK WAX—The Best Round Pod Wax.....	1.60	2.85	10.20	17.00
Pods perfectly round, nearly straight clear yellow, stringless and of highest quality. Plant healthy and prolific. Matures early. Seed black. We consider this the best round pod wax bean.				

UNRIVALED WAX.....	1.65	3.00	10.80	18.00
Flat pods of good length, clear yellow and of fine quality.				

DAVIS' White Wax.....	1.60	2.85	10.20	17.00
Hardy and prolific. Long, flat, yellow pods of fair quality. Matures early.				

HODSON WAX.....	1.65	3.00	10.80	18.00
Late, very prolific, long, straight, flat pods.				

REFUGEE WAX.....	1.65	3.00	10.80	18.00
Round pods of fine quality, very prolific, matures late.				

BEANS—Dwarf Green-Podded Varieties

If your market requires a round-pod bean, *Stringless Black Valentine*, *Giant Stringless Green Pod*, *Tendergreen* and *Black Valentine* are the most profitable. If a flat pod is required, *Bountiful* is one of the best varieties.

	(Bu.)			
	7½ lb.	15 lb.	60 lb.	100 lb.
CONSERVA—(New)	30 lbs. (½ bu.)	\$11.40	\$3.15	\$6.00
Round light green pods of the highest quality. Early and prolific. Matures large clusters of pods at one time. See full description in Retail catalogue.				
TENDERGREEN—The Best Round Podded Green	1.80	3.30	12.00	20.00
Early and prolific with long round pods of fine quality. See description on page 6.				
STRINGLESS BLACK VALENTINE (New)	1.65	3.00	10.80	18.00
This new bean has all the advantages of the old Black Valentine and in addition is <i>entirely stringless</i> . The pods are somewhat inclined to flatten out as they grow older. This is one of the heaviest yielding varieties we know of.				
FULL MEASURE	1.60	2.85	10.20	17.00
Long, round stringless pods of high quality, early and a very profitable market variety.				
GIANT STRINGLESS GREEN POD	1.60	2.85	10.20	17.00
Larger than Stringless Green Pod and fully as early. Round, light green pods of high quality.				
BLACK VALENTINE	1.25	2.25	7.80	13.00
A profitable market bean. Produces immense crops of long, straight, light green pods, round as a pencil and very attractive in appearance but not stringless.				
BOUNTIFUL—An Improved Strain	1.50	2.70	9.60	16.00
Very early and prolific. Long, flat pods, stringless and of fine quality. One of the best green podded varieties for market and shipping. See page 6.				
New Stringless Refugee	1.65	3.00	10.80	18.00
A stringless strain of the old Refugee.				
Lowe's Champion	1.80	3.30	12.00	20.00
One of the Horticultural or Cranberry beans. Pods 5 in. long, flat, green, straight and stringless.				
Ruby Dwarf Horticultural	1.60	2.85	10.20	17.00
Used for shelling green. Pods light green splashed with deep red.				
FRENCH HORTICULTURAL	1.80	3.30	12.00	20.00
The best strain of dwarf Horticultural beans. More prolific and vigorous than other kinds. Pods long, straight and highly colored. Matures a little later than Ruby Dwarf Horticultural and has taller vines. We have a very fine true strain of this variety.				

LIMA BEANS—Dwarf or Bush Varieties

Where beans are sold in the pods, *Fordhook* is the most popular bush Lima. The beans are of good size and very plump, and the vines are prolific. For shelling, *Burpee's Bush Lima* of the old type and *Burpee's Improved* are often used. The beans are large and flat. *Henderson's* is small, early, and very prolific.

	(Bu.)			
	7½ lb.	15 lb.	60 lb.	100 lb.
FORDHOOK BUSH LIMA	\$2.35	\$3.75	\$13.80	\$23.00
The most popular bush Lima. Beans large, thick and deep green. The best of this class.				
BURPEE'S BUSH LIMA, Wonder Strain	1.80	3.30	12.00	20.00
Large, flat beans, medium early.				
Burpee's IMPROVED Bush Lima	1.95	3.60	13.20	22.00
Larger pods and thicker beans than the old variety and of deeper green color.				
Henderson's Bush Lima	1.65	3.00	10.80	18.00
Small flat pods and beans, early and very prolific.				

LIMA BEANS—Pole

IDEAL—Large Podded	1.80	3.30	12.00	20.00
Very large pods often 8 in. long, early and prolific. We regard this <i>the best large podded Pole Lima</i> .				
Early Leviathan Lima	1.80	3.30	12.00	20.00
Early, prolific, and pods of large size.				
Challenger Lima	2.15	4.05	15.00	25.00
An improved strain of Dreer's Pole Lima. Large plump beans of the "Potato" class.				

OTHER POLE BEANS

	(Bu.)			
	7½ lb.	15 lb.	60 lb.	100 lb.
SCOTIA	\$1.95	\$3.60	\$13.20	\$22.00
Long, slender, green pods of the very best quality. Wonderfully prolific.				
IDEAL MARKET	1.85	3.45	12.60	21.00
A very early green podded pole bean. It is 10 days earlier than Kentucky Wonder. The beans are 5 to 6 in. long, round, stringless of very fine quality.				
Golden Cluster Wax	1.95	3.60	13.20	22.00
Long, broad, deep yellow pods of finest quality; beans white. Pods often 7 in. long and an inch broad.				
Kentucky Wonder, Sometimes Called "Old Homestead"	1.50	2.70	9.60	16.00
Long, slender, green pods of fine quality. Early and very prolific.				
Kentucky Wonder Wax	1.65	3.00	10.80	18.00
Long, flat, yellow pods of fine quality. One of the best wax pole beans.				
White Dutch Runner	1.95	3.60	13.20	22.00
Very large white beans often used in place of Limas. Very prolific and early.				
Scarlet Runner	2.15	4.05	15.00	25.00
Used principally as an ornamental vine.				
KING HORTICULTURAL or Speckled Cranberry	1.80	3.30	12.00	20.00
Much superior to the old London Horticultural. Earlier, longer pods of brighter color and stringless.				

FIELD BEANS

BOSTON MARROW or White Marrowfat95	1.50	4.80	8.00
(Perry Strain). The best strain of this variety. Large plump white beans.				
RED KIDNEY—California Grown	1.35	2.40	8.40	14.00
Large red beans, very prolific and a profitable variety. Special disease resistant strain. Grown especially for us in California.				
White Kidney	1.00	1.65	5.40	9.00
Large, white, kidney-shaped beans; yield heavy crops and are of the highest quality for baking.				
Robust Pea Beans90	1.40	4.20	7.00
A select strain of Pea beans that is resistant to the mosaic disease and yields much more.				
IMPERIAL or PROLIFIC TREE	1.20	2.00	6.00	10.00
The beans are white, kidney-shaped, somewhat smaller than White Kidney and of fully as high quality. Yields heavy crops.				
Yellow Eye	1.00	1.65	5.40	9.00
Large plump white beans with a yellow blotch at the "eye."				

Ruebe (Ger.)

BEETS

Barbabetola (It.)

For early bunching *Crosby's Egyptian* and *Early Wonder* are the most popular kinds and if really first-class strains are used there are no better beets for the purpose. Some gardeners prefer the old flat *Egyptian Blood Turnip* beet, because it makes salable beets a little quicker than Crosby's. *Early Wonder* is very similar to Harris' Special Strain of Crosby's Egyptian. For later use *Detroit Dark Red* is excellent. For late fall and winter use it is best to sow the seed about the middle of July in the North and a little later further South. Sow about 10 lbs. of seed to acre.

	¼ lb.	lb.	10 lb.
CROSBY'S EGYPTIAN, Harris' Special Strain	\$.40	\$1.15	\$10.00
The finest bred strain of this beet. Deep red color. See description page 5. Seed of our own growing.			
CROSBY'S EGYPTIAN, Bright Red Strain25	.80	7.50
Color lighter red than Harris' Strain.			
EARLY WONDER40	1.15	10.00
Quite similar to our special strain of Crosby's Egyptian. Early and of good deep red color. Our strain of this variety is very fine.			
Egyptian Blood Turnip25	.80	7.50
Flatter than Crosby's and is preferred by some for early bunching.			
DETROIT DARK RED, Harris' Special Strain30	.95	8.50
Seed of our own growing, very superior stock. See description on page 6.			
ECLIPSE30	.85	8.00
Early, globe-shaped and very handsome beet, of somewhat lighter color than Detroit but earlier.			
Early Blood Turnip30	.85	8.00
A good old variety, large flat beets.			
LONG SMOOTH BLOOD RED30	.90	8.00
8 to 10 inches long and very dark red. Grows half out of the ground.			
LONG SEASON70	2.25	21.50
A very late variety of extra fine quality but not of good shape for general market purpose. See description in our Retail Catalogue.			

MANGELS AND SUGAR BEETS FOR STOCK

	$\frac{1}{4}$ lb.	lb.	10 lb.
DANISH YELLOW GIANT—The Heaviest Yields.	\$.20	\$.45	\$ 4.00
An immense yielder. Very large, oval, deep yellow and rich. Flesh white.			
Golden Tankard.20	.45	4.00
Oval and easily harvested; yellow flesh. The strain we offer is very fine.			
NEW "HALF SUGAR" MANGEL.20	.45	4.00
Intermediate between a sugar beet and mangel. Yields immense crops of beets rich in sugar.			
MAMMOTH LONG RED.20	.45	4.00
Very large, long red roots of good quality. One of the best yielders and keeps well.			
Giant Yellow Eckendorf.20	.45	4.00
Very large yellow mangel with white flesh. Blunt at the bottom, easily harvested and immense yielder.			

BROCCOLI

	$\frac{1}{4}$ oz.	Oz.	$\frac{1}{4}$ lb.	lb.
ITALIAN GREEN SPROUTING (CALABRESE).	\$.25	\$.75	\$2.15	\$7.50
This popular vegetable is a very easy one to raise. The culture is the same as cauliflower. Broccoli commands high prices on the market, and as two or three cuttings may be made from each plant this is a very profitable crop to grow. Our stock is the true type which is in demand in the markets. See full description on page 6.				

Rosenkohl (Ger.) BRUSSELS SPROUTS Cavolo di Brussels (It.)

Cultivation is the same as for cabbage or cauliflower. There is always a good demand for the sprouts, and they bring profitable prices. *The point is to get the right seed.* We are pleased to be able to offer a strain of *Long Island Improved Dwarf* that produces heavy yields of sprouts. Gardeners will find this a profitable crop.

Special Strain Long Island Brussels Sprouts

We are able to offer a very fine strain of Long Island Improved Brussels Sprouts that produces a high percentage of firm, large sprouts so that the yield is high. The plants are not tall but the stems are completely covered with large and very firm sprouts. Growers find this a very profitable strain to use. Oz. 60c; $\frac{1}{4}$ lb. \$1.90; 1 lb. \$6.50.

Blumenkohl (Ger.) CAULIFLOWER Cavolflore (It.)

Super Snowball is the best strain for early market, making solid heads very early, *Snowball* is about a week later and makes large solid heads. *Danish Perfection* has more leaves than *Snowball*, which protects the head better. It is a week or ten days later than *Snowball*, and a little earlier than *Danish Giant* or *Dry Weather*, which produces large solid heads, but should be set out earlier.

	Oz.	$\frac{1}{4}$ lb.	lb.
SUPER SNOWBALL.	\$3.25	\$11.00	\$40.00
The earliest and heads most uniformly. See page 7 for description.			
SNOWBALL, Perfected Strain.	2.00	7.00	25.00
A very fine improved strain of the true Snowball type. The seed we offer is the very finest strain obtainable, 95 per cent of the plants make good heads. See also page 7.			
CATSKILL SNOWBALL.	2.00	7.00	25.00
A fine strain of Snowball grown extensively in the Catskill Mountain region. Matures early and the heads are very compact and uniform.			
DANISH PERFECTION.	2.00	7.00	26.00
A strain of Snowball Cauliflower with more leaves to cover the head, which does away with tying to some extent. Heads very solid and without protruding leaves. Matures a week later than Snowball.			
Danish Giant Snowball or "Dry Weather"	2.00	7.00	26.00
Ten days or two weeks later than Snowball and of more vigorous growth and stands drought better.			
ERFURT EARLY DWARF. Madsen's Stock No. 3.	2.00	7.00	25.00
Much like Snowball, but has somewhat shorter stems and matures a little earlier. This strain has proven the best in several trials made in New York State.			

An Ideal Combination

Cauliflower growers find that Snowball and Super Snowball make an ideal combination to grow. Plant part of your acreage in Super Snowball to get the high prices for the early cauliflower and the balance with Harris' Snowball to assure you of the finest cauliflower in the market for the balance of the season.

"Your Super-Snowball Cauliflower was the best I have ever grown. About 98% of the plants forming marketable heads." Wm. E. Van Alstyne, Waterliet, N. Y. Nov. 19, 1931.

Kraut (Ger.)

CABBAGE

Cavolo capuccio (It.)

Early Varieties

Early Jersey Wakefield has long been the standard extra early cabbage, but a round head sells better in most markets and on this account *Golden Acre* and *Copenhagen Market* have proved more profitable. *Enkhuizen Glory* has larger heads and is a week later and is the best variety to grow for kraut. *Burpee's All Head Early* has large flat heads and is a week or two later than the *Enkhuizen Glory*.

	Oz.	¼ lb.	lb.
GOLDEN ACRE—The Earliest Cabbage	\$.50	\$1.45	\$ 4.75
Matures a week <i>earlier</i> than Jersey Wakefield. The heads are round and very uniform, every plant making a good head. They resemble a fine type of Copenhagen Market although smaller, are very firm and a good bright green in color. This variety has proved very profitable for the first early crop.			
GOLDEN ACRE. Special Strain	1.00	3.40	12.00
A special strain of this variety which is more uniform in shape and maturity than any other. See page 7.			
EARLY JERSEY WAKEFIELD25	.75	2.50
The standard early variety. Heads pointed, of medium size and very hard. Our strain is particularly fine, the heads being very uniform and early.			
COPENHAGEN MARKET30	.90	3.00
Our strain is earlier and more uniform than usual strains of this variety. Heads round, hard and have few outside leaves. Larger but about 10 days later than Golden Acre.			
ENKHUIZEN GLORY. Originators Strain25	.75	2.50
A very large, early cabbage. Heads as large as the late kinds and mature much earlier. Has proved to be a most profitable variety for market and kraut.			
Burpee's All Head Early25	.75	2.50
Heads flat and of good size. Medium early. Used for main crop, for fall market and shipping.			

Late or Main Crop Varieties

For fall market or for kraut the medium early kinds are better than the very large late kinds. *Midseason Market* and *Enkhuizen Glory* are excellent.

For late fall and winter market the *Danish Ballhead* is the most profitable. The *Short Stemmed* strain we offer yields more than any other of the Danish type, which have smaller heads and do not yield quite as many.

Savoy cabbage is often profitable for home market. Red Cabbage is profitable on rich land, and often brings high prices.

	Oz.	¼ lb.	lb.
MIDSEASON MARKET. Heavy Yields	\$.35	\$1.00	\$3.25
A new cabbage which has proved one of the most uniform and heaviest yielding medium early varieties grown. The heads are almost perfectly round, large and solid. We highly recommend this variety for market, shipping and kraut.			
DANISH BALLHEAD. Short Stem30	.85	2.75
Has proved to be a very heavy yielding strain of Danish cabbage. The heads are large, solid and of good deep green color.			
HARRIS' BALLHEAD. Short Stemmed. Own Growing60	1.75	6.00
This strain of our Own Growing is the best we know of. Heads are medium size, deep, very solid and very uniform in shape.			
HOLLANDER60	1.75	6.00
A very fine strain of Danish cabbage with short stems, medium size round heads which are extremely firm and retain their green color unusually long in storage. A heavy yielder.			
DANISH BALLHEAD. Intermediate30	.85	2.75
Heads are deeper and not as flattened as the short stemmed. The color is deeper green and they keep very well in storage. A profitable type to raise.			
Surehead25	.75	2.50
Deep, heavy heads. A good late variety.			
SUCCESSION25	.75	2.50
A popular cabbage for fall market. Large flat heads.			
All Seasons25	.75	2.50
Large flat heads.			
Volga25	.75	2.50
The heads are large, round and solid; a heavy cropper.			
Premium Flat Dutch25	.70	2.25
Old standard kind. Large, heavy head.			
Winningsstadt25	.75	2.50
Pointed heads of medium size.			
MAMMOTH ROCK RED30	.90	3.00
The largest red cabbage. Hard, round, deep red. One of the best red varieties for market or shipping.			
SAVOY. Perfection Drumhead30	.85	2.75
Heads large of fine quality and quite firm; color very deep green, and leaves are very much curled. Matures late and keeps all winter.			

CHINESE CABBAGE—PE-TSAI

This Chinese cabbage has proved to be a very profitable crop for muck land. There is a good demand for it in New York and other large markets in carload lots. The seed is sown in July or August and the crop matures in eight to ten weeks.

	Oz.	$\frac{1}{4}$ lb.	lb.
CHIHLI—The New Popular Variety	\$.35	\$1.10	\$3.50
A new variety. The earliest and surest to head. The plant produces long solid cylindrical heads of fine quality. The heads are often two feet long.			
Pe-Tsai30	.90	3.00
Large heads. 18 to 20 in. high.			
Wong Bok30	.90	3.00
Short compact heads of fine quality.			

Carroten (Ger.)**CARROTS****Carota (It.)**

Carrots often prove very profitable. They do best on muck or soil of that nature, although very good crops are raised on sandy loam. For late fall market the seed is usually sown in June or first of July. If small carrots for bunching are wanted the seed may be sown as late as August 1st in the North and later further South. It requires 2 to 4 lbs. of seed for an acre, depending upon how far the rows are apart.

Chantenay is considered one of the best varieties for market or table use. The roots grow very smooth and not too long. *Danvers Half Long* grows an inch or two longer and yields more, so is preferred when the crop is to be used for feeding stock. *Hutchinson* is 2 inches longer than *Danvers* and yields very large crops. *Coreless* or *Amsterdam Forcing* is of fine quality for table use. *Perfection* is similar but larger. *Oxheart* makes a nice short, thick carrot for bunching. *Early French Short Horn* is very short, but grows rapidly and is best for forcing. All of these varieties are deep orange in color.

	$\frac{1}{4}$ lb.	lb.	10 lb.
CHANTENAY. "A Superior Strain"	\$.30	\$1.00	\$ 7.50
The most popular market variety, 6 to 7 inches long, stump-rooted, deep orange color and very smooth. The strain we offer grows an inch longer than ordinary strains.			
CHANTENAY, Red Cored.40	1.25	11.00
This new strain is really a "Coreless Chantenay." See page 5 for full description.			
TENDERSWEET—The Sweetest Carrot. oz. 50c	1.20	4.00	36.00
This new carrot is the best quality we know of. The color is striking, being deep reddish-orange outside and in, and with distinct red marking in the base of the leaves. Grows 7-8 in. long. Somewhat tapering and smooth.			
DANVERS HALF LONG.30	1.00	7.50
Grows 6 to 7 in. long, deep orange color, not quite as smooth as Chantenay. A heavy cropper.			
Pride of Denmark.55	1.75	16.50
A wonderfully fine carrot growing 8 to 9 in. long and 2 to 3 in. through, being practically the same size the whole length. It closely resembles the Hutchinson but has less core and deeper color. Yields well.			
NANTES.30	1.00	9.00
One of the best "coreless" varieties, 6 to 7 in. long the same size the whole length, and stump rooted. Color deep orange and "coreless."			
CORELESS or Amsterdam Forcing.45	1.45	13.50
The carrots grow about 5 to 6 in. long and 1 to 1½ in. through and the same size the whole length. The end is blunt and with very fine rat-tail root. The color is deep orange red all through the root including the core. This is a beautiful carrot for bunching or to market in bulk.			
PERFECTION45	1.45	13.50
A new carrot, similar to Amsterdam Forcing, but are larger being 6 to 8 in. long. They are practically the same size the whole length, <i>coreless</i> and very smooth. A fine carrot for fall market.			
HUTCHINSON85	2.75	25.00
The roots are 8 to 9 in. long, nearly the same size the whole length and stump-rooted. Color deep orange. Our seed is of the finest market garden strain.			
OXHEART or Guerande.30	1.00	9.00
Short, thick carrots, used for bunching and table use. Very easily pulled. About 4 inches long, deep orange yellow, and of fine quality.			
MASTODON or WHITE VOSGES.25	.65	6.00
Large, white carrot for stock feeding. Immense yielder. 8 to 10 inches long.			
Long Orange.30	.90	8.00
Roots a foot long, yields large crops.			
Early French Short Horn.40	1.25
For forcing. About 3 inches long; very early.			

OUR GENERAL RETAIL CATALOGUE

This price list does not include all the seeds and plants we sell. Our general catalogue for 1932 will be issued in January and contains more detailed descriptions of varieties than it is possible to give in this price list. It will be mailed to all our customers and to others who ask for it. If you do not get your copy, we will gladly send it if you will notify us.

*Sellerie (Ger.)***CELERY***Sedano (It.)*

An ounce of seed will produce about 8,000 plants. It requires 20,000 plants to the acre. For very early planting the seed should be sown in February or first of March. For late crop the seed is sown in the open ground as early as possible. Great care must be taken not to cover the seed too deep. More failures to get the seed to germinate are due to this cause than any other. *Golden Plume* and *Golden Self Blanching* or "*Paris Golden*" are grown more extensively than any other kinds. These are the most profitable varieties for market up to January. *Easy Blanching* will keep longer than *Golden Self-Blanching*. *French's Success* and *Salt Lake* are the very best for late winter market and winter storage.

	Oz.	$\frac{1}{4}$ lb.	lb.
GOLDEN PLUME or WONDERFUL. Proved Seed.	\$1.25	\$4.25	\$15.00
The stalks are larger than Golden Self-Blanching but resemble that variety very closely. It is of the same color and general appearance but of more vigorous, sturdy growth, forming heavy, solid stalks which blanch quickly and are of fine quality. We have a very fine strain of Golden Plume which will be found equal, if not superior to any sold, even at much higher prices. See also page 8.			
GOLDEN SELF-BLANCHING. "Old" Strain. Proved Seed.75	2.35	8.00
The same as has been raised for many years. The stalks are large, rather short and form large heavy hearts.			
GOLDEN SELF-BLANCHING. "New" Strain. Proved Seed.75	2.35	8.00
Grows very rapidly and is strong and healthy, resisting blight well. Some growers think it is too tall for late crop and storage, but for the early crop it is preferred.			
GOLDEN PHENOMENAL. Proved Seed.	1.60	5.75	20.00
A somewhat larger type of Golden Plume. See page 11.			
EASY BLANCHING or Sanford Superb.60	1.75	6.00
A very good variety to follow Golden Self-Blanching. It is the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanched. The strain we offer is very carefully grown and is far superior to the seed usually sold.			
SALT LAKE. NEW. The Best Green Celery.75	2.35	8.00
This is the best green celery we have yet found. See also page 8.			
FRENCH'S SUCCESS.75	2.35	8.00
One of the best green varieties for winter storage. The stalks are of medium length, with a compact, well developed heart, very tender and brittle. Blanches slowly to a pure white and keeps better than any other kind with which we are acquainted.			
GIANT PASCAL, Special Strain.50	1.50	5.00
This strain of Giant Pascal is largely used in New England and is considered one of the very best for late winter market. The stalks are large, very solid and blanch pure white. This strain is far superior to the ordinary Giant Pascal.			
EMPEROR.50	1.50	5.00
The stalks are large, very thick, crisp and solid and of superior quality. Blanches pure white.			
Columbia.50	1.50	5.00
Much resembles Golden Self Blanching in growth and appearance, but is a green celery and does not blanch so quickly and keeps longer. A valuable kind for early winter market.			

Harris' Celery Plants

We can supply early frame grown plants, or field grown plants for later planting. They are well grown and true to name. See page 38 for varieties and prices.

CELERIAC—Turnip-Rooted Celery

	Oz.	$\frac{1}{4}$ lb.	lb.
Large Smooth Prague.	\$.25	\$.75	\$2.50
DELICACY.30	.90	3.00
A new variety of Celeriac of medium size and of fine quality.			

CHICORY

WITLOOF or FRENCH ENDIVE. We have a very fine strain of this popular salad plant. For description and price of seed see under Endive. Page 27.

*Feld salat (Ger.)***CORN SALAD or Feticus***Valeriannt (It.)*

	Oz.	$\frac{1}{4}$ lb.	lb.
Large Round-leaved.	\$.15	\$.35	\$1.20

*Garten-Kresse (Ger.)***CRESS***Agretto (It.)*

	Oz.	$\frac{1}{4}$ lb.	lb.
Extra Fine Curled.	\$.12	\$.30	\$.85
Also called "Pepper Grass."			
WATER CRESS.50	1.30	4.25
Improved Broad-leaved. Much better than common Water Cress.			

*Welschkorn (Ger.)***SWEET CORN***Mais (It.)*

We make a specialty of high grade Sweet Corn seed. It is raised in the North and is *earlier* and far sweeter and better than Western grown seed. The seed is very carefully cured and is of strong germination.

It requires about 12 lbs. of seed to plant an acre.

Note—25 lbs. of one variety will be supplied at the 100 lb. rate. A bushel weighs 40 to 50 lbs., depending on the variety.

For prices of sweet corn in quantities of less than 6 lbs. ($\frac{1}{2}$ peck) see our general catalogue.

Yellow Varieties

	6 lb.	12 lb.	100 lb.
HARRIS' NEW EXTRA EARLY BANTAM	\$1.40	\$2.40	\$18.00
The best early yellow sweet corn. See description on page 3.			
WHIPPLE'S YELLOW—The Largest Early Yellow	1.20	2.05	15.00
A grand early yellow corn. One of the most profitable market varieties. See description on page 2.			
GOLDEN BANTAM	1.20	2.05	15.00
Small, medium early, kernels yellow and of fine quality. Our stock is carefully bred to the true original strain and is far superior to most Golden Bantam.			
Golden Sunshine	1.35	2.30	17.00
A new extra early yellow corn. Matures a week earlier than Golden Bantam. Ears 6 to 7 in. long, 12 rowed and deep yellow. Quality very good. See page 3.			
BANTAM EVERGREEN	1.25	2.15	16.00
A large, medium late yellow corn of fine quality. Ears nearly as large as Stowell's Evergreen but yellow like Golden Bantam and with something of the Bantam quality.			
BUTTERCUP	1.20	2.05	15.00
A larger, improved Golden Bantam. See page 3.			
Golden Giant	1.25	2.15	16.00
A good yellow corn to follow Bantam as it matures a week later and has larger ears, 12 rowed, and the corn is of high quality.			
SPANISH GOLD—New	2.00	3.45	27.00
An extremely early yellow sweet corn of good size. See also page 2.			
GOLDEN GEM—The Earliest Variety	1.80	3.25	25.00
This new corn is the earliest we have yet found. See page 3 for full description.			

White Varieties

GILL'S EARLY MARKET—The Earliest White	1.35	2.30	17.00
A most profitable variety for market gardeners. See description on page 4.			
WHIPPLE'S EARLY (White)	1.20	2.05	15.00
The largest of the early white varieties. See description on page 4.			
MIMMS' HYBRID. Pedigree Strain	1.35	2.30	17.00
One of the best and most prolific medium late kinds. Ears have 12 to 14 rows of white kernels. Little earlier than Evergreen, and has larger ears of better quality and more of them. See page 4.			
HOWLING MOB	1.20	2.05	15.00
Large, 12 to 14 rowed ears, medium early and of good quality. A popular market corn. Our strain is very fine, being earlier than others and the ears more uniform.			
Black Mexican	1.25	2.15	16.00
Of very fine quality. Our stock is true.			
Hickox Improved	1.25	2.15	16.00
Very large ears, longer than Evergreen and earlier than that variety and of better quality.			
Early Mammoth	1.35	2.30	17.00
Earlier than late Mammoth, with immense ears. Matures with Evergreen and has much larger ears.			
LONG ISLAND BEAUTY	1.40	2.40	18.00
A late corn with immense ears, often over a foot long and 7 to 9 inches around, 16 to 20 rows of pure white kernels that are of fine quality. A profitable late market corn.			
STOWELL'S EVERGREEN—Early Strain	1.20	2.05	15.00
The standard late corn. We have a very fine strain grown in this neighborhood that is 10 days earlier and far better than western grown seed.			
Country Gentleman	1.25	2.15	16.00
Late; small ears, of fine quality.			

POP CORN

A bushel weighs 56 lbs. 10 lbs. will plant an acre. 30 lbs. or more of one variety will be supplied at the 100 lb. rate.

	7½ lb.	15 lb.	100 lb.
WHITE RICE	\$1.20	\$2.10	\$12.00
The best and most popular variety for market.			
JAPANESE HULLESS	1.35	2.40	14.00
Very small ears, white corn of high quality.			
Black Diamond	1.50	2.70	16.00
Black or blue kernels of high quality.			

Gurken (Ger.)**CUCUMBERS****Cetriolo (It.)**

To market for slicing *Harris' Perfection* and *Longfellow* are excellent varieties. *Early Fortune* is a little shorter but otherwise similar and is excellent for "dills." *Harris' Double Yield Pickle* produces more small pickles than any other kind. It is also very early and valuable on that account for market as a slicing cucumber.

HARRIS' DOUBLE YIELD PICKLE. The Earliest Variety..... $\frac{1}{4}$ lb. 1b. 10 lb.
\$.40 \$1.25 \$11.50

See description on page 9.

LONGFELLOW..... .60 2.00 19.00

A new variety of great merit. See page 9.

HARRIS' PERFECTION..... .70 2.25 21.00

We consider this one of the best white spine varieties for market and shipping where a long deep green cucumber is wanted, it being more uniform in size, shape and color than any variety we know of. The fruit is long (12 in.) straight and deep green with small white rays at the blossom end. This variety is also well adapted for dill pickles. Crop short.

DAVIS' PERFECT..... .35 1.10 10.00

Long straight fruit, tapering at both ends, very dark green and holds its color well.

EARLY FORTUNE. Selected Stock..... .35 1.10 10.00

A very fine strain of White Spine. It is medium early and productive, excellent for market and pickles. The fruit is 7 to 9 inches long, slightly tapering and of deep green color. It holds its color well when shipped.

China..... 1.50 5.00

Grows 15 to 20 in. long and very slender. For description see our retail catalogue.

IRONDEQUOIT HOTHOUSE. Forcing.....

See description and price below.

WOODRUFF'S HYBRID..... .45 1.40 13.00

One of the best of the White Spines for market. Grows 8 to 10 in. long and stays green a long time. We have a very fine strain of this cucumber.

EARLY WHITE SPINE..... .30 .90 8.00

Early and very productive. Excellent for pickles as well as for slicing.

Extra Long White Spine..... .35 1.10 10.00

A little later than Early White Spine, but has longer fruit.

IMPROVED LONG GREEN..... .40 1.25 11.50

Very popular for both table use and for pickles. A Black Spine variety and turns deep yellow when ripe.

CHICAGO PICKLING..... .30 1.00 9.00

Very prolific and profitable for pickles. The young fruit is straight, square ended and of medium deep green color.

Green Prolific or Boston Pickling..... .30 1.00 9.00

Very prolific; short, bright green fruit. A profitable variety for pickles.

Perfected Jersey Pickle..... .30 1.00 9.00

Longer and more slender than Chicago and Boston Pickling. An excellent variety.

KLONDIKE..... .30 1.00 9.00

A popular White Spine variety for pickles. Dark green, straight and very prolific.

Early Green Cluster..... .30 1.00 9.00

Short fruit produced early and in great abundance. Of rather light green color.

Everbearing..... .30 1.00 9.00

Starts bearing early and continues a long time. The cucumbers are rather short with blunt ends.

Japanese Climbing..... .45 1.50

A vigorous grower; long, smooth fruit of excellent quality.

West India Gherkin..... .45 1.50

Used for pickling.

Lemon Cucumber..... .55 1.75

A real cucumber about the size and shape of a lemon, used both for table and pickling.

IRONDEQUOIT HOTHOUSE CUCUMBER

The gardeners around Rochester have developed this very fine hothouse cucumber which has proved the most profitable variety to raise under glass.

The fruit is long, slender, deep green and nearly perfectly solid, there being very few seeds and in some fruit none at all. The vines are wonderfully vigorous and very prolific.

The seed we offer was saved entirely from fruit grown under glass and will produce very fine uniform cucumbers. 100 seeds \$1.00; 500 seeds \$4.00.

Dill (Ger.)**DILL****Aneth (It.)**

LONG ISLAND MAMMOTH..... \$.10 $\frac{1}{4}$ lb. 1b. .60
Much superior to common dill. Larger and more productive.

DANDELION

LARGE THICK-LEAVED. Harris' Special Strain..... .55 1.65 5.50
Much superior to the common variety, having thicker and broader leaves. The seed we offer is of our own growing and of the true thick leaved strain. See also page 9.

Eier pflanze (Ger.)**EGG PLANT****Petronciano (It.)**

Black Beauty produces fruit of good size and of deep purple color, and is the most popular market variety. *New York Improved* is very similar, but the plant grows a little taller and the fruit matures a little later. *Extra Early Dwarf Purple* is the earliest, but the fruit is small.

	Oz.	$\frac{1}{4}$ lb.	lb.
BLACK BEAUTY—True Stock Large, handsome, dark purple fruit, almost black. It matures early and is the most popular variety.	\$.50	\$1.35	\$4.40
New York Improved (Thornless) The standard variety, having large dark purple fruit.	.50	1.35	4.40
Extra Early Dwarf Purple Very early and prolific, but not as large as above kinds.	.45	1.20	4.00
EARLY LONG PURPLE Fruit 10 to 12 inches long, not over 2 to 3 inches through. Early and is very prolific.	.45	1.20	4.00

Endivien (Ger.)**ENDIVE****Endivia (It.)**

Seed can be sown any time from early spring to August 1, in the Northern States. For late fall market sow in July. Sow in rows 20 to 24 inches apart and thin the plants to a foot apart. To blanch, tie up the leaves with soft cord or raffia. It requires about 20 days to blanch thoroughly in cool weather. *Green Curled* is the most popular market variety. *Broad-leaved Batavian* is also in good demand. "*French Endive*" is Witloof Chicory and is quite distinct from true Endive, and its culture is entirely different.

	Oz.	$\frac{1}{4}$ lb.	lb.
GREEN CURLED PANCALIER. Best for late market The leaves of this <i>pink ribbed</i> variety are not so finely cut as the Green Curled and have fuller, heavier hearts. Grown extensively by market gardeners for a late crop. This variety does best on rich soil.	\$.15	\$.45	\$1.50
GREEN CURLED Large leaves finely cut and curled. Green ribbed.	.15	.35	1.10
EVER WHITE CURLED The leaves are dense, finely cut and curled and very light green, almost white, so blanch very quickly.	.15	.35	1.10
Moss Curled Finely cut and curled; not so large as Green Curled.	.15	.40	1.25
Broad-leaved Batavian (Escarolle) Broad dark green leaves curled at the edges.	.15	.35	1.10

"FRENCH ENDIVE"—Witloof Chicory

This is a crop that can be grown during the winter in a dark place and with very little expense. There is a good demand for "French Endive" in the markets of all the large cities.

The seed we offer is an exceptionally fine strain, being grown from *especially selected fully developed forced heads*. This seed will give a very high percentage of perfect heads when the roots are forced. Oz. 45c; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00.

Fenchel (Ger.)**FENNEL****Finocchio (It.)**

	Oz.	$\frac{1}{4}$ lb.	lb.
Florence Forms a large bulb which is excellent when cooked. We offer a very fine imported stock which runs true to type, forming uniformly large bulbs.	\$.20	\$.60	\$2.00

Knoblauch (Ger.)**GARLIC****Aglio (It.)**

The bulbs should be separated into flakes or "cloves" and set out like onion sets. Bulbs for planting: lb. 35c; 5 lbs. or more 25c per lb.

Blatterkohl (Ger.)**KALE****Cavolo verdi (It.)**

Used principally in the late fall and winter. Sow seed in July and treat like cabbage.

	$\frac{1}{4}$ lb.	lb.	10 lb.
DWARF CURLED GREEN or Blue Scotch Very finely curled leaves of dwarf spreading habit and deep bluish-green color.	\$.25	\$.75	\$7.00
Tall Scotch Curled Grows two feet tall with finely curled leaves. A very hardy variety.	.25	.70	6.50
Siberian Also called Sprouts. Dwarf spreading broad leaves curled only on the edges. Color blue gray. Very hardy.	.20	.60	5.00

Knollkohl (Ger.)**KOHL RABI****Cavolo rapa (It.)**

	Oz.	$\frac{1}{4}$ lb.	lb.
EARLY WHITE VIENNA The best variety for table use, very early and can be used 10 weeks after sowing.	\$.20	\$.50	\$1.75
Early Purple Vienna Differs from White Vienna only in the color of the bulb which is light purple.	.20	.55	1.85

Lattich (Ger.)

LETTUCE

Lattuga (It.)

For forcing *May King* is an excellent variety. It will stand more heat than *Big Boston*, and matures quicker. *Big Boston* is fine for cool houses and cold frames. For a curly leaf lettuce *Grand Rapids* is by far the most popular. Grows rapidly and the leaves stand upright so it can be planted close.

For summer planting on upland, *New York No. 12*, *White Boston* and *Salamander* are good. *Big Boston* and *White Boston* is most largely grown on muck.

Romaine or *Cos Lettuce* can be grown both in the hothouse and open ground and is in good demand in many markets. *Trianon Self-Folding* is the largest; the heads often being nearly 1 ft. high.

HARRIS' SPECIAL BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. Heads uniformly solid and compact, and stands a long time without bolting. Some of the largest growers in this country are using Harris' Big Boston and find it equal if not superior, to any other stock obtainable at any price. We are confident there is no better Big Boston. Oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25; 10 lbs. or more \$1.15 per lb.

"I have tried five or six kinds of Big Boston Lettuce and yours is the best." E. K. Ballard, Lexington, Mass.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lbs.
WHITE BOSTON. Proved Strain.	\$.20	\$.55	\$1.75	\$16.50
Like Big Boston, but lighter green and without the red tinge; stands hot weather better and heads earlier. Our strain is very fine, there is none better. See page 10.				
May King.15	.40	1.25	11.50
A very early head lettuce for open ground or forcing.				
Holyrood Hot-Weather.15	.40	1.25	11.50
Large, firm heads. Stands well in the summer and is very slow to run to seed.				
BIG BOSTON. Special Strain15	.40	1.25	11.50
Our strain has been carefully bred for many years and is the most uniform stock we have seen. See above.				
SALAMANDER.15	.40	1.25	11.50
Large heads, light green; stand well in hot weather. <i>Dreer's All Heart</i> and <i>Black Seeded Tennis Ball</i> are the same as this variety. A fine summer head lettuce.				
WONDERFUL or NEW YORK.20	.60	2.00	19.00
Very large firm heads; almost as large as Wakefield cabbage. We have a very fine strain. This is the "Iceberg" lettuce grown on the West coast and shipped to our Eastern markets during the winter.				
NEW YORK No. 12—"Iceberg" for the East.25	.75	2.50	24.00
An improved early strain of this variety especially valuable for Eastern conditions. See page 10.				
ICEBERG.15	.45	1.50	14.00
One of the best for open ground. Large, firm heads, curled and blistered leaves; light green.				
Prize Head.20	.55	1.75	16.50
Early, crisp, loose heads of good quality; leaves curled and tinged with reddish brown.				
Crisp as Ice.25	.75	2.50
Forms compact, medium size heads very early. The heads are tinged with deep brown. The quality is very fine.				
GRAND RAPIDS. "Special Greenhouse Strain."15	.45	1.50	14.00
Of upright growth. Curled leaves. Valuable for forcing. Our strain is very fine.				
Ohio Grand Rapids.15	.45	1.50	14.00
Grows larger and is deeper green than Grand Rapids.				
Hanson.15	.45	1.40	13.00
Large heads of fair quality.				
Black Seeded Simpson.15	.40	1.25	11.50
Loose heads of curly leaves; grows very large.				
Early Curled Simpson.15	.45	1.40	13.00
Forms bunches of much curled leaves. Light green.				
COS or ROMAINE, Trianon Self-Folding.20	.55	1.60	15.00
Used for forcing and open ground. Large, long heads of fine quality.				
Chicken.15	.40	1.25	11.50
Immense leaves. Runs up rapidly. Use for green feed for chickens.				
Mignonette.25	.75	2.50
An early small headed brown tinged lettuce.				

Poree (Ger.)

LEEK

Porro (It.)

	Oz.	$\frac{1}{4}$ lb.	lb.
Large American Flag.	\$.20	\$.55	\$1.75
The most popular variety. 5 lbs. or more \$1.65 per lb.			

*Melone (Ger.)***MUSKMELON or Cantaloupe***Popone (It.)*

Sugar Rock is excellent for shipping as well as for nearby markets. *Osage* or *Miller's Cream* is in demand in some cities and is a large, round melon of high quality and good for nearby markets. *Bender's Surprise* is now the most popular of the large melons. It is very firm and keeps a long time after picking and is of the highest quality. *Emerald Gem* is small, but early and of high quality. It is not good for shipping. *Golden Champlain* is the earliest melon grown and is valued on that account. *Delicious* is very early and excellent for market. *Hale's Best* is the most popular melon for shipping to distant markets.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
BENDER'S SURPRISE. "Harris' Special Strain"	\$.30	\$.85	\$ 2.75	\$ 25.00
A grand melon. Unequalled in fine flavor, size and keeping qualities. See pg. 12.				
DELICIOUS—The Earliest Large Melon50	1.35	4.50
Very early. A new variety of great value on account of its earliness and high quality. See page 13.				
GOLDEN OR LAKE CHAMPLAIN25	.75	2.50	22.50
The earliest melon and valuable on that account. The melons are medium size, nearly round, fairly well netted and light green color turning to golden when ripe. The flesh is orange and of fairly good quality.				
SUGAR ROCK also called "Honey Rock"30	.85	2.75	25.00
A new melon of great merit. See description and illustration on page 8.				
HALE'S BEST15	.45	1.50	14.00
The earliest of the Rocky Ford type. Medium size, oval fruit. Very heavily netted. Flesh thick, deep orange and of finest quality. The melons are remarkably uniform in size, shape and quality. (See illustration in our general catalogue.)				
Irondequoit or Tip Top15	.45	1.50	13.50
Large, round, netted; yellow flesh. A melon of very high quality but not such a good keeper as the Bender. Largely grown in Ohio.				
Hearts of Gold15	.40	1.25	11.50
A fine melon for shipping in baskets—medium in size, round and well netted. Flesh orange yellow and of high flavor. Very firm and holds up well a long time after picking.				
MILLER'S CREAM, OR OSAGE15	.40	1.25	11.50
Oval, dark green, slightly netted, yellow flesh of the highest quality. A very fine early melon and a profitable one for market.				
EMERALD GEM15	.40	1.25	11.50
Small, round, green, slightly netted, with yellow flesh of finest flavor; very early and prolific.				
Extra Early Knight15	.40	1.25	11.50
A very early melon popular in markets where known. The fruit is of medium size, oval in shape and well netted. Flesh is green and is sweet and of good flavor.				

*Wasser-Melone (Ger.)***WATERMELON***Cocomero d'acqua (It.)*

Fordhook Early, *Stone Mountain* and *Ice Cream* or *Peerless* are valuable for the North because they will ripen before frost. *Hungarian Honey* is small but early and of very fine quality.

For places south of New York City, *Kleckley's Sweets* is better because they are larger and of high quality.

	$\frac{1}{4}$ lb.	lb.	10 lb.
STONE MOUNTAIN. Try This One For Market	\$.45	\$ 1.25	\$ 11.50
Large, dark green, rounded fruit with bright red flesh of finest quality. Ripens early. Is one of the best varieties for the North. Largest of the early varieties and of high quality.			
FORDHOOK EARLY25	.75	7.00
A very desirable variety for cool climates. Early, fairly large and with bright red flesh of very good quality.			
COLE'S EARLY25	.75	7.00
A very early good sized melon. The fruit is striped light and dark green. Valued principally on account of its earliness.			
Halbert Honey25	.75	7.00
Long, dark green, flesh red and of finest quality. Medium early.			
KLECKLEY'S SWEETS25	.70	6.50
Long, deep green, attaining a large size and of fine quality. One of the best kinds. Our Northern grown seed is superior to Southern grown. Seed saved from best melons only.			
Ice Cream or Peerless25	.75	7.00
One of the best early varieties. Large, light green, early and of fine quality.			
HUNGARIAN HONEY30	1.00
Small, round, dark green, with bright red flesh of delicious sweetness. Very early.			
GREEN CITRON, or Colorado Preserving25	.75	7.00
(Green Seeds.) Used for preserves. Very prolific.			

MUSTARD

	Oz.	¼ lb.	lb.
FORDHOOK FANCY	\$.10	\$.25	\$.65
Finely cut and curled leaves, very ornamental. Finest variety for salads and garnishing.			
Giant Southern Curled10	.20	.60
Very large curled leaves.			

Zweibel (Ger.)

ONIONS

Cipollo (It.)

For market and storage a globe-shaped, yellow onion is preferred, although in some markets a red onion sells best. *Yellow Globe Danvers* is nearly round. *Ohio Yellow Globe* is slightly flattened on the bottom and *Southport Yellow Globe* is more pointed at the bottom. The Danvers and Ohio strains are a little earlier than Southport and are the most popular varieties. *Mountain Danvers* is the earliest yellow globe onion. *Prizetaker* is larger than Globe Danvers and a little later.

Ebenezer or "*Japanese*" is a flat yellow onion that keeps the year around. It is especially valuable for raising large onions early in the summer from sets.

For pickles *Early Barletta* is best. The seed should be sown very thick. 50 lbs. per acre or 2 ozs. per 100 ft. of row so the onions will be small and the yield heavy.

White Welsh is the most popular variety for early green bunching onions or scallions.

Yellow Varieties

	Oz.	¼ lb.	lb.	10 lb.
OHIO YELLOW GLOBE	\$.15	\$.45	\$1.50	\$14.00
A very fine strain of Yellow Globe Danvers onion especially suited to muck land. See also page 11.				
MOUNTAIN DANVERS20	.50	1.60	15.00
A new early globe onion. See description on page 11.				
YELLOW GLOBE DANVERS15	.45	1.50	14.00
The standard yellow market variety. Our seed is grown with great care and the onions are of uniform globe shape and deep yellow color.				
SOUTHPORT YELLOW GLOBE15	.45	1.50	14.00
Of perfect globe shape, large size. A week later than Yellow Globe Danvers.				
EBENEZER or "Japanese"20	.60	2.00	17.50
A very fine yellow onion that will keep all winter and is of mild, pleasant flavor. The onions are flattened and of a light yellow color.				
RIVERSIDE SWEET SPANISH30	.85	2.75	26.00
Very large handsome yellow onion. See page 12.				
PRIZETAKER20	.55	1.75	16.50
Large yellow onion of very handsome globe shape and mild flavor. Does not keep as well as Danvers. Fine for fall market.				

White Varieties

Mammoth Silver King20	.60	2.00	19.00
Very large white, flat onion used principally for bunching while green. Seed sown in the spring will make large bunching onions in July and August.				
WHITE PORTUGAL or SILVER SKIN—For Bunching25	.70	2.25	20.00
Flat, white onion of mild flavor and early. Excellent for pickling and early green onions.				
EXTRA EARLY BARLETTA25	.70	2.25	20.00
The best small white onion for pickling. Our seed is the real Barletta onion, producing very small round, white onions that mature very early. Sow at the rate of 50 lbs. per acre.				
SOUTHPORT WHITE GLOBE25	.75	2.40	22.50
The largest and finest white onion. A very profitable variety for experienced growers as it always commands the highest prices.				
White Welsh25	.70	2.25	21.00
Does not form a bulb, but can be sown in the summer for early spring bunching onions. Perfectly hardy.				

Red Varieties

SOUTHPORT RED GLOBE, Harris' Special Selected20	.60	1.85	17.00
Large, perfectly round, deep red onion; keeps well and is the best red variety.				
Large Red Wethersfield20	.55	1.70	16.00
Very large, deep red, flat.				

ONION SETS

White sets make the whitest and most attractive bunching onions. The *Yellow* sets, especially the *Ebenezer*, are best to produce large dry onions for early use.

NOTE—Please write for price if a considerable quantity is required.

	Pk. (8 lbs.)	Bu. (32 lbs.)
Yellow Sets	\$1.20	\$3.50
Sound and clean.		
White Sets—Silverskin	1.30	4.00
Fine small sets.		
EBENEZER or "JAPANESE" SETS	1.25	3.75

OKRA or GUMBO

	Oz.	¼ lb.	lb.
White Velvet	\$.10	\$.20	\$.60
Smooth light green pods of medium length.			
Perkins' Long-pod10	.20	.60
Long green pods straight, somewhat corrugated and of the best quality.			

Erbesn (Ger.)**PEAS****Pisello (It.)**

Mammoth Podded Extra Early is the earliest large podded variety and is very hardy. *Thomas Laxton*, *World's Record* and *Gradus* are only three or four days later and of better quality. *Laxtonian* and *Hundredfold* are two or three days later than *Gradus* and have still larger pods. *Laxton's Progress* is an improved *Hundredfold* with larger pods. *Blue Bantam* is the same as *Hundredfold*. *Little Marvel* produces wonderful crops, but the pods are not as large.

Alderman is a strain of *Telephone*, but are better than the old type, having darker colored peas and larger pods. *Prizewinner* is a little later than *Telephone*, has short heavy vines and very large, deep green pods, and is one of the best late varieties.

Note—We are now selling peas by weight only. A pound is about 1 pint, 15 lbs. equal a peck and 56 lbs. a bushel. 30 lbs. or more of one variety will be supplied at the 100 lb. rate. For prices of peas in amounts of less than 7½ lbs. (½ peck) please refer to our general catalogue.

Peas in lots of 100 lbs. or more are sent by prepaid freight.

	Early Varieties			
	7½ lb.	15 lb.	56 lb.	100 lb.
	(Bu.)			
Alaska	\$1.40	\$2.55	\$ 8.40	\$15.00
Very early, small pods. 2 ft.				
Surprise or Eclipse	1.75	3.00	10.08	18.00
Very early and of fine quality. Small pods. Very prolific. 2 ft.				
First and Best, or Pedigree Extra Early	1.60	2.70	8.96	16.00
Extra Early; pods three inches long, well filled. This is the earliest variety. 2 ft.				
MAMMOTH PODDED EXTRA EARLY	1.75	3.00	10.08	18.00
Much larger pods than other extra early kinds. 3 ft. See page 10.				
LAXTON'S PROGRESS	1.65	2.85	9.52	17.00
We consider this the largest and best of the early dwarf varieties. It resembles <i>Hundredfold</i> , but is a little earlier and larger. These two points together with the large yield makes it a very profitable market variety. 18 in. See page 10.				
THOMAS LAXTON	1.65	2.80	9.24	16.50
Very early; medium-sized pods. One of the most profitable market peas. Our stock is very fine, 3 ft.				
SUTTON'S IDEAL	1.65	2.85	9.52	17.00
A new early pea. Very similar to <i>Thomas Laxton</i> but a day earlier and the pods are a little larger. Bears heavy crops and is a profitable market variety. 3 ft.				
GRADUS, or Prosperity	1.65	2.85	9.52	17.00
Large pods, early and of highest quality. Standard market garden variety. 3 ft.				
WORLD'S RECORD	1.70	2.95	9.80	17.50
An improved <i>Gradus</i> , being a little earlier and larger and has shorter vines. It is of the finest quality and a profitable variety for market. 2½ ft.				
LITTLE MARVEL	1.65	2.85	9.52	17.00
Very prolific, matures a day or two later than <i>Nott's Excelsior</i> and has pods a little larger; vines stocky. 15 in.				
Nott's Excelsior	1.65	2.85	9.52	17.00
Early dwarf vines, medium-sized pods; one of the best early dwarf peas. 15 in.				
Laxtonian (Pioneer)	1.65	2.85	9.52	17.00
A dwarf pea with pods nearly as large as <i>Telephone</i> and matures as early as <i>Little Gem</i> . Pods and peas dark green. 18 in. high.				
HUNDREDFOLD or Blue Bantam	1.65	2.85	9.52	17.00
Much like <i>Laxtonian</i> , but larger and better. Vines very strong and sturdy, 16 to 18 in. high. Pods 4 in. long and deep green. A very fine early dwarf pea.				
Medium and Late Varieties				
ONWARD	1.80	3.15	10.64	19.00
A valuable new pea maturing a day or two before <i>Alderman</i> . 3 ft.				
SENATOR	1.75	3.00	10.08	18.00
Pods 5 in. long and closely filled with deep green peas which are of very fine quality. Matures a day or two after <i>Telephone</i> or <i>Alderman</i> . 3½ ft.				
LINCOLN	1.80	3.15	10.64	19.00
Long narrow pods completely filled with 9 to 10 large deep green peas; vines 2½ ft. Produces immense crops. Matures a few days earlier than <i>Alderman</i> .				
Advancer	1.65	2.85	9.52	17.00
Pods three inches long, well filled; a heavy yielder. Vines 2½ ft. tall.				
Carter's Daisy or Dwarf Telephone	1.75	3.00	10.08	18.00
Similar to <i>Telephone</i> except that the vines grow only 2 ft. tall.				
PRIZEWINNER	1.75	3.00	10.08	18.00
A variety of the <i>Stratagem</i> type, but is much more productive. Vines 2½ ft. tall, very sturdy and produce good crops of large, deep green pods. A very fine late market pea.				
IMPROVED STRATAGEM	1.75	3.00	10.08	18.00
Large pods, stocky vines 2½ ft. A very fine late market pea of highest quality.				
ALDERMAN	1.55	2.70	8.96	16.00
Pods larger than the old <i>Telephone</i> and much better filled. One of the very best, if not the best pea of the <i>Telephone</i> class. Pods often 6 in. long and of deep green color. 4½ ft.				
Telephone	1.60	2.70	8.96	16.00
Our seed is of a superior strain, having large pods of a very deep green. 4½ ft.				
Champion of England	1.65	2.85	9.52	17.00
The standard tall, late pea. 5 ft.				
Mammoth Melting Sugar	2.10	3.75	12.88	23.00
Edible pods. 4½ ft.				

Pastinake (Ger.)

PARSNIPS

Pastinaba (It.)

	Oz.	¼ lb.	lb.	10 lb.
HARRIS' MODEL	\$.15	\$.40	\$ 1.10	\$ 10.00

PEPPERS

Peperone (It.)

Giant Crimson, Magnum Dulce and Chinese Giant are very large peppers, but do not bear as well as the varieties with smaller fruit, such as *Neapolitan* and *Harris' Earliest* which are also earlier. *Harris' Early Giant* is very large and much earlier and more prolific than other large kinds. *California Wonder* is very large and has exceptionally thick flesh. *Ruby King* and *Worldbeater* produce well and are very large peppers, but somewhat late for the northern parts of the country. Of the pungent or "hot" peppers, *Giant Cayenne, Heifer Horn* and *Hungarian Wax* are the best.

	Oz.	¼ lb.	lb.
HARRIS' EARLY GIANT. The Largest Early Pepper	\$.65	\$ 2.10	\$ 7.00
This is the earliest large pepper which we know. <i>Northern Grown Seed.</i> See description on page 14.			
HARRIS' EARLIEST. The Earliest and Most Prolific Sweet Pepper65	2.10	7.00
This is the earliest sweet pepper we know of. The peppers are medium size somewhat resemble Bull Nose but are very mild and sweet. The plants are dwarf and compact and covered with fruit there often being a dozen ripe peppers on a plant at one time besides many green ones. Seed of our own growing.			
HARRIS' IMPROVED SQUASH (NEW)	1 ¼ oz. 40c	1.25	4.00
This improved strain of Squash Pepper is earlier, more prolific and the peppers have thicker meat than the old type. See full description and illustration in our <i>Retail Catalogue.</i> Seed of our own growing.			
GIANT CRIMSON or OHIO CRIMSON50	1.50	5.00
As large as Chinese Giant but earlier and more prolific.			
MAGNUM DULCE60	1.75	6.00
The largest pepper of which we have any knowledge. Medium late.			
CALIFORNIA WONDER60	1.90	6.50
A new sweet pepper with very thick flesh. Fruit large, smooth and very heavy. Medium early and yields well. A valuable variety. See also page 14.			
Ruby King35	1.00	3.25
Large, sweet, deep green. Turns to bright red when ripe. Fruit 4 to 5½ in. high, 3 in. through.			
NEAPOLITAN35	1.10	3.50
Very early, medium size and mild. Fruit 3½ to 4 in. high and 2 in. through. Rather light green when young, bright red when ripe. The fruit stands upright on the plant.			
WORLDBEATER35	1.10	3.50
One of the best large red peppers. The fruit resembles Ruby King but is larger; the flesh is mild and quite thick. A high yielder when well grown.			
OSHKOSH65	2.10	7.00
The largest and best yellow pepper we know of.			
Golden Dawn50	1.50	5.00
A fine yellow pepper. Large and sweet.			
Pimiento30	.90	3.00
Very thick, heavy fruit of medium size, pointed at the bottom. Very deep green when young, bright red when ripe, mild flavor. Matures rather late, but plants are quite prolific.			
SQUASH or TOMATO, (also called Burpee's Sunnybrook)45	1.20	4.00
Small round peppers the shape of a tomato. Prolific and the peppers are mild and sweet, excellent for salads.			
Large Bell or Bull Nose35	1.10	3.50
Early, medium size, quite prolific, somewhat pungent or "hot."			
GIANT CAYENNE60	1.75	6.00
Much larger than the old Cayenne and equally pungent. Fruit 3 to 4 in. long and 1½ in. through at top, coming to a point at the bottom. Very early and prolific.			
HEIFER HORN50	1.50	5.00
A hot pepper, longer than Giant Cayenne, a little later and not quite so hot. One of the largest and best of the "hot" peppers.			
HUNGARIAN WAX60	1.75	6.00
The peppers are of a waxy yellow when young, turning red when ripe. Somewhat "hot" or pungent.			

Kuerbis (Ger.)**PUMPKINS****Zucca (It.)**

	Oz.	1/4 lb.	lb.	10 lb.
SMALL SUGAR or Pie Pumpkin	\$.10	\$.25	\$.65	\$ 6.00
Small, round, deep yellow and of good quality. Early and prolific. The most popular market variety.				
ORANGE WINTER LUXURY15	.40	1.25	11.50
This improved strain has deep orange skin and orange yellow flesh. Very fine quality. Seed of our own growing. See description in our retail catalogue.				
Mammoth Potiron, or King of Mammoths15	.40	1.20	11.00
Immense fruit, often weighing over 100 lbs. Color salmon pink, flesh deep yellow. Easily raised, a valuable pumpkin for stock feeding.				
Large Cheese10	.20	.60	5.50
Flattened, ribbed, mottled green and light yellow.				
CONNECTICUT FIELD, or Big Tom10	.20	.60	5.50
The common yellow field pumpkin.				

CERTIFIED SEED POTATOES

Certified Seed. All the potatoes we offer have been certified after field inspection by the New York State Seed Improvement Association.

About Shipping.—The potatoes are shipped in sacks holding 150 pounds (2½ bu.) or barrels holding 180 lbs. (3 bu.). We can usually ship safely by the 25th of March, but not before, except to the Southern States.

Prices Subject to Change.—The prices here quoted are subject to changes of the market and to our acceptance on receipt of order. Lowest prices will be quoted by letter any time. Please state the kinds you are interested in.

	Single Bu.	Sack 150 lbs.	Bbl. 180 lbs.
IRISH COBBLER. Certified Seed	\$1.75	\$3.75	\$5.00
The most popular round white early potato.			
Irish Cobbler, Second Size. Certified	1.40	3.25	4.40
From same certified fields, but not large enough for first size.			
NO. 9 or HEAVY WEIGHT. Certified Seed	1.75	3.75	5.00
One of the heaviest yielding late potatoes we know of. Round, white, medium shallow eyes, vines very strong and free from disease.			
GOLDEN RURAL or RURAL RUSSET. Certified Seed	1.75	3.75	5.00
One of the very best potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome round, white potatoes. We think larger crops can be raised with this variety than any other kind with which we are acquainted.			

Potatoes in Barrels.—We can ship potatoes in wooden barrels holding 3 bu. (180 lbs.) if so ordered at prices quoted above.

Radies (Ger.)**RADISH****Raranello (It.)**

For forcing, *Early Scarlet Globe* and *Harris' Special Scarlet Forcing* are the most popular. The former is oval in shape, while the latter is round. Both grow very rapidly. *Crimson Giant Globe* is similar to *Early Scarlet Globe*, but grows larger and requires a little more time to mature.

For the open ground, *Early Scarlet Globe* is excellent. *Earliest Scarlet White Tipped* is very handsome and resembles *French Breakfast*, which is more oval in shape. *Iceberg* is a fine long, white radish, smooth and of fine quality.

White Strasbourg, *Giant White Stuttgart* and *Delicacy* are large, white radishes for summer and fall use.

Winter radishes are sown in July or August and used in the fall and winter.

Red or Scarlet Varieties

	1/4 lb.	lb.	10 lb.
EARLY SCARLET GLOBE, Special Strain (100 lbs. \$60.00)	\$.25	\$.70	\$ 6.50
The most popular variety for forcing and outdoor culture. Oval to round in shape, very bright red, flesh white, firm and crisp. The strain we offer is especially good for forcing as the tops are small, the radishes clear scarlet without purple tinge, and grow very rapidly, being ready to pull in about 20 days. See also page 13.			
Early Scarlet Globe20	.50	4.50
As usually sold. Tops not as small as our Special Strain, and for this reason it is better for open ground than for greenhouse use.			
HARRIS' SPECIAL SCARLET FORCING25	.80	7.00
Round, deep red, small leaves and extremely early. A very superior variety for forcing and the open ground.			
CRIMSON GIANT GLOBE25	.80	7.00
Very large forcing radish. Not so early as <i>Early Scarlet Globe</i> , but larger and stands longer without becoming pithy.			

Radishes continued on next page.

RADISH (Red Varieties)—Continued

	$\frac{1}{4}$ lb.	lb.	10 lb.
EARLIEST SCARLET WHITE-TIPPED. Forcing Strain	\$.25	\$.80	\$ 7.50
The radishes are round and are white on the bottom and part way up the sides. This is the finest strain of white-tipped radish, having small tops and is very fine for forcing.			
French Breakfast25	.75	7.00
Oval, bright red with white tips; early.			
Long Scarlet Short Top25	.70	6.50
Excellent long radish for open ground.			
Chartier25	.70	6.50
Grows 4 to 5 inches long, bright red with white tips.			

Radish—White Varieties

ICICLE or Pearl Forcing20	.55	5.00
Long, slim, white radish of very rapid growth. The best long white radish for forcing and in open ground. Our strain has unusually small tops.			
Delicacy25	.80	7.50
A very fine white radish for summer or late fall use. Of globe shape, pure white and of fine quality. One of the best white summer varieties.			
White Strasburg25	.70	6.50
Large, long, white summer radish.			
Giant White Stuttgart25	.75	7.00
Very large, round or top shaped white summer radish.			

Radish—Winter Varieties

Sow in August and store in moist sand for winter.

Chinese Rose30	.90	8.50
About 5 inches long, red skin, with white flesh of best quality.			
Long Black Spanish25	.70	6.50
Skin black, flesh white and very solid, 6 inches long.			
Black Spanish Turnip25	.70	6.50
Round or turnip-shaped roots.			
CELESTIAL, or Chinese White30	.85	7.50
Long, pure white, crisp, very mild.			

Rhabarber (Ger.)

RHUBARB or PIE PLANT

Rabarbaro (It.)

	$\frac{1}{4}$ lb.	lb.	10 lb.
Myatt's Linnaeus	\$.45	\$ 1.40	\$ 13.00
Early, large red stalks.			

RHUBARB ROOTS. See page 38.

Haferwurz (Ger.)

SALSIFY or Vegetable Oyster

Sassefrica (It.)

	$\frac{1}{4}$ lb.	lb.	10 lb.
Mammoth Sandwich Island	\$.55	\$ 1.85	\$ 17.50
The largest and best variety.			

Kuerbiss (Ger.)

SQUASH

Zucca (It.)

Summer Varieties

Giant Summer Straightneck now sells best in most markets, although *Mammoth White Bush Scallop* (called "*Cymling*" in the South) is in demand in many cities. The fruit is saucer-shaped and scalloped around the edge. *Italian Vegetable Marrow*, called also "*Cocozelle*," is now in much demand. The fruit is long, mottled, dark and light green, plant is bushy without runners. It is used when half grown.

	$\frac{1}{4}$ lb.	lb.	10 lb.
GIANT SUMMER STRAIGHTNECK. Our Own Growing	\$.75	\$ 2.50	\$ 22.50
A new variety which is very popular. The squash are the same as Early Giant Crookneck, but without the curved neck of that variety. A very fine strain. See page 15.			
EARLY GIANT CROOKNECK40	1.25	11.50
Larger than the old Bush Crookneck and equally early. Our strain is very fine.			
Mammoth White Bush Scallop35	1.10	10.00
Large, flat, white fruit.			
Early Yellow Bush Scallop30	1.00
Similar to the white, except in color.			
ITALIAN VEGETABLE MARROW (Cocozelle)40	1.25	11.50
Long, mottled green fruit of high quality.			
Vegetable Marrow (English)40	1.25	11.50
The fruit is 8 in. to a foot long, 4 to 5 in. in diameter and of a creamy white color. It is used when half grown.			

SQUASH—Fall and Winter Varieties

Boston Marrow is about the first to ripen and is excellent for canning and pies. The *Improved Warded Hubbard* grows larger than the true *Hubbard*, and the shell is covered with lumps or "warts" making a squash that sells well in market, but we do not think the quality is quite as good as the true old *Hubbard*. *Blue Hubbard* keeps better than the others and is a popular market variety. *Delicious* and *Quality* are both finer squashes than *Hubbard*, but do not yield quite as much. They are profitable for market where there is a demand for squash of high quality rather than size and appearance.

QUALITY	$\frac{1}{4}$ lb.	lb.	10 lb.
A winter squash, small in size, but of very fine quality. The flesh is very dry, fine grained and sweet. Seed of our own growing. See illustration in our Retail Catalogue.	\$.75	\$2.50	\$22.50
Boston Marrow25	.80	7.50
Popular fall squash, deep orange color. Used principally for canning and pies.			
WARREN Improved New England Strain75	2.50	22.50
Large, flattened at ends. Color deep orange red. Thick flesh of high quality.			
DELICIOUS40	1.25	11.50
Smaller than Hubbard, but of finer quality, deeper green shell with orange flesh, dry and sweet.			
GOLDEN DELICIOUS40	1.25	11.50
Similar in shape to Delicious, but of a deep orange color outside. Flesh is thick, dry and of finest quality. An excellent yellow squash for roadside stands.			
HUBBARD—True35	1.10	10.00
Dark green fruit of high quality. We have a fine strain of this variety.			
IMPROVED WARTED HUBBARD40	1.25	11.50
Larger and more warted than the true Hubbard.			
Golden Hubbard40	1.20	11.00
The same shape as Hubbard but deeper orange yellow.			
BLUE HUBBARD Seed of Our Own Growing90	3.00	27.50
A very fine large squash of the Hubbard type. The color is blue-gray. The shell is very hard and the squash keep a long time. This is the most uniform strain we know of.			
Table Queen or Des Moines40	1.25	11.50
Small dark green fruit 5 to 6 in. long, $4\frac{1}{2}$ in. in diameter, deeply ribbed and very hard. Flesh light yellow and of fine flavor.			

Spinat (Ger.)

SPINACH

Spinace (It.)

Long Standing Bloomsdale is the best strain of *Savoy-leaf* for spring sowing. It is very hardy and is also used for wintering over for which it is one of the best kinds. The new *Blight Resistant Savoy-leaf* is valuable where spinach blight is troublesome. It should be sown in the late summer or fall only. *King of Denmark* is large, stands up well and remains without running to seed a long time. *Nobel Giant Leaf* has still larger leaves and grows very rapidly.

PLEASE NOTE: We shall be glad to quote special prices to growers who use large amounts of spinach. Please write.

LONG STANDING BLOOMSDALE	lb.	10 lb.	100 lb.
A great improvement over the old type as it stands much longer without running to seed. The leaves are dark, well curled and blistered. One of the very best for spring sowing. See also page 15.	\$.30	\$2.35	\$21.00
HARRIS' BIG CROP30	2.25	20.00
Early, large leaved. Grows very rapidly and is large enough to cut sooner than most other kinds. Gardeners will find this a profitable early variety for spring sowing.			
KING OF DENMARK30	2.45	22.00
This spinach will stand two weeks longer than any other kind except Long Standing Bloomsdale. The leaves are very dark green, quite thick and have small stems. On this account and because of the heavy yield this is one of the best varieties for canning.			
ESKIMO or GIANT THICK-LEAVED30	2.25	20.00
An improved variety with very large, thick, dark green leaves; grows rapidly and stands well without running to seed. Hardy and an excellent kind for wintering over.			
NOBEL GIANT-LEAVED30	2.45	22.00
A new large leaved early spinach of merit. See description on page 15.			
Victoria or Long Standing30	2.45	22.00
Round, thick leaves, deep green and blistered. An excellent kind for spring sowing.			
Norfolk Savoy-Leaf30	2.15	19.00
Round, blistered leaves. One of the best for late fall sowing.			
BLIGHT RESISTANT SAVOY-LEAF30	2.25	20.00
A strain of Norfolk Savoy-leaf that is resistant to the leaf blight or "yellows" which often ruin whole crops of spinach in some localities. Use for fall crops only. See page 14.			
PRINCESS JULIANA30	2.45	22.00
A valuable variety. Has very thick crumpled dark green leaves. Grows rather slowly but stand well without bolting.			
NEW ZEALAND50	4.50	40.00
Not a true spinach. Valuable for summer.			

"I have found that your seed is very satisfactory. It is almost ten years since I began using Harris' Seeds and they have been more satisfactory every year." O. L. Wilcox, Montague, Mass. Nov. 3, 1931.

Salbei (Ger.)

SAGE

Salvia (It.)

	Oz.	¼ lb.	lb.
Broad-leaved	\$.20	\$.60	\$1.75

When once started will last for years. Sow in open ground and thin to 6 inches apart.
For other HERBS see our Retail Catalogue.

Beisskohl (Ger.)

SWISS CHARD or Spinach Beet

Bieta (It.)

The *Fordhook Giant* has well curled, dark-green leaves with very broad, white ribs and is the most popular variety for market. *Lucullus* grows very large and has crinkled leaves. Both varieties are quite hardy and will survive the winter if given some protection.

	¼ lb.	lb.	10 lb.
FORDHOOK GIANT	\$.30	\$.90	\$ 8.50
A large strain of the <i>Lucullus</i> type but with deep green leaves and broad white ribs.			
Lucullus30	.85	8.00
Large crinkled, light green leaves with broad white ribs.			
Silver Leaf25	.80	7.50
Deep green leaves with very large white ribs.			

Sauerampfer (Ger.)

SORREL

Acetosa (It.)

	¼ lb.	lb.	10 lb.
Improved Broad-Leaved	\$.45	\$1.50	\$14.00
Narrow Leaved (Special Strain)	1.10	3.50	30.00

This type is in demand on some markets. True seed of our own growing.

Weisse Rube (Ger.)

TURNIPS

Navone (It.)

Both the *Purple Top* and *White Milan* grow rapidly and are the first to mature. *Purple Top Strap-leaf* is very similar but a little later. *Purple Top White Globe* is a little later than *Strap-leaf* but a much better turnip and is the most popular variety for market. *White Egg* is a handsome white egg-shaped turnip, and *Golden Ball* a nice, smooth, round yellow variety which grows rapidly. *Snowball* is round and snow white. *Yellow Aberdeen* is globe-shaped and grows to a larger size, better suited for feeding stock than for market.

	¼ lb.	lb.	10 lb.
EARLY WHITE MILAN	\$.25	\$.75	\$7.00
Very early, flat white turnip.			
EARLY PURPLE TOP MILAN25	.75	7.00
The earliest purple top turnip, very fine.			
PURPLE TOP WHITE GLOBE20	.50	4.50
Like <i>Strap-Leaf</i> , but round instead of flat. Very fine fall turnip.			
Purple Top Strap-leaf20	.50	4.50
White, purple top, flat, very rapid grower.			
Snowball20	.60	5.50
Pure white, round as a ball; early, with small tops.			
White Egg20	.60	5.50
Pure white, globe shape.			
GOLDEN BALL20	.60	5.50
Round, smooth yellow. A fine turnip.			
Cowhorn20	.60	5.50
Long, white, green top.			
Yellow Aberdeen20	.55	5.00
Large, round yellow turnip; very firm and keeps a long time.			
SHOGIN30	1.00	9.50
The best turnip for greens, very much superior to <i>Seven Top</i> . The turnips are white, flat and of fine quality. The tops are light green of good quality and grow in great clusters.			

RUTA BAGAS or Swede Turnips

MACOMBER—Our Own Growing65	2.00	19.00
A white purple top Swede of very fine quality for table use.			
IMPROVED LONG ISLAND25	.75	7.00
A very fine strain of <i>Yellow Purple Top Ruta Baga</i> . The roots are smooth and handsome with very small neck and few side roots. The flesh is yellow and of fine quality.			
Perfection Selected Swede25	.75	7.00
A selected strain of purple top yellow Swede. Grows large but is very smooth and of fine grain. Larger and later than <i>Improved Long Island</i> .			
White Sweet or French25	.65	6.00
A good White Swede with green top.			

TREAT YOUR SWEET CORN SEED

Experience on our own farm has taught us that it pays to treat seed corn with "SEMESAN JR." for protection against seed borne diseases. It increases germination too. See back cover for prices.

Liebesapfel (Ger.)**TOMATOES****Pomo d'oro (It.)**

The very earliest tomatoes are never quite as well colored as the later varieties, but *Earliana* and *Canadian* of carefully selected strains are very nearly perfect. *John Baer* is about a week later than *Earliana*, ripening with *Bonny Best* and is very similar to that excellent variety. *Marglobe* is large, late and resistant to blight. *Chalk's Jewel* is very similar to *Bonny Best*.

Of the pink varieties, *June Pink* is the earliest and resembles *Earliana*, except in color. *Early Detroit* is a little later, but has large, smooth, well-colored fruit. *Globe* is a few days later.

	Oz.	$\frac{1}{4}$ lb.	lb.
PRITCHARD'S SCARLET TOPPER (NEW)($\frac{1}{4}$ oz. \$.65)	\$2.00	\$6.00	\$20.00
A very worthy variety just recently introduced. The fruit is brilliant red, globe shape, solid and prolific. See also page 16.			
BREAK O'DAY75	2.30	8.00
A new early variety which resulted from a cross between <i>Marglobe</i> and <i>Marvanna</i> . The fruit is very early, globe shaped, smooth and solid. This tomato is valuable where plants are staked and early fruit of high quality is required. Seed of our own growing.			
EARLIANA. Harris' Extra Early Strain50	1.50	5.00
This is the smoothest and best colored strain of <i>Earliana</i> obtainable. It is <i>extremely early</i> and the fruit is perfectly smooth, very solid and firm and well colored right up to the stem. Gardeners find this a very profitable tomato to raise. See page 16.			
CANADIAN. Extra Early60	1.75	6.00
An extremely early variety. Quite similar to <i>Earliana</i> . The fruit is of good size, smooth and of a deep red color. See page 17.			
MARGLOBE. Blight Resistant50	1.45	4.75
This new <i>blight resistant</i> variety has been found very valuable for canning, market and shipping. The fruit is large globe shaped, smooth, deep red and very firm. The vines are vigorous and do not blight. Matures about the same time as <i>Harris' Stone</i> . See page 17.			
JOHN BAER. Harris' Special Strain50	1.45	4.75
Large, smooth fruits, colors uniformly bright red all over. One of the best second early kinds. See description on page 17.			
BONNY BEST. Harris' Special Strain50	1.45	4.75
Very early, large, smooth and bright red with no green around the stem. See page 16.			
June Pink50	1.50	5.00
Very similar to <i>Earliana</i> except as to color, which is pink like <i>Beauty</i> .			
EARLY DETROIT50	1.35	4.50
A pink variety with smooth, evenly colored fruit of good size. A very fine pink tomato.			
Chalk's Early Jewel35	1.10	3.50
Medium early, smooth and well colored.			
HARRIS' SUCCESS50	1.35	4.50
A very fine main crop variety. Smooth, well colored and solid. See also page 17.			
HARRIS' EARLY STONE50	1.35	4.50
We have raised and selected this seed in the North until now our strain of <i>Stone</i> ripens only a little later than <i>John Baer</i> or <i>Bonny Best</i> . The fruit is deep red, smooth, solid and very sweet, and the yield is very high. See page 17.			
Dwarf Stone50	1.35	4.50
Plants like <i>Dwarf Champion</i> with fruit like <i>Stone</i> .			
GLOBE50	1.35	4.50
As round as an apple; color deep pink. One of the very best varieties of this color.			
PONDEROSA55	1.60	5.50
Magnificent, heavy, solid fruit, often weighing 2 lbs. or more; light pink; medium early; does not color very well and is somewhat irregular.			
Dwarf Champion50	1.30	4.25
Early, pink, medium size, dwarf stocky plant.			
Livingston Beauty50	1.30	4.25
Large, late, pink, very smooth.			
Red Cherry50	1.50	...
Very small, globe shaped, red fruit in clusters.			
Yellow Plum50	1.40	...
Plum shaped, small, yellow fruit.			
Red Plum50	1.40	...
Small plum shaped fruit.			
Red Pear or Fig50	1.50	...
Small pear-shaped, red fruit.			
Red Currant60
Very small round fruit, about the size of a red cherry.			
Yellow Pear50	1.40	...
Small pear shaped, yellow fruit.			
GOLDEN QUEEN50	1.45	4.75
Large, smooth yellow fruit.			
Ground Cherry or Husk Tomato50	1.45	4.75
Yellow fruit in husks, used for preserves.			

For Greenhouse Use

We can now offer a fine strain of *Comet Tomato* seed grown under glass and especially adapted to greenhouse use. This variety has good sized fruit, perfectly smooth, evenly colored and is very prolific. Pkt. 25c; $\frac{1}{8}$ oz. \$1.00; $\frac{1}{2}$ oz. \$3.00.

VEGETABLE PLANTS, ROOTS, ETC.

Orders for plants will be entered at any time and the plants sent when ready or when it is time to set them out. 500 plants will be supplied at the 1000 rate.

For those who use vegetable plants in large quantities, if ordered before Feb. 15th, we can grow to your order at special prices. Write for quotations on your requirements.

Shipping plants. At the prices given below the plants are sent by **express** at the expense of the purchaser (except those marked "postpaid"). If plants are wanted by parcel post an extra charge is made for postage as follows; To places in the 2nd zone (150 miles) 1c per lb., 3rd zone 2c per lb., 4th zone 4c per lb., 5th zone 6c per lb. *50 plants are furnished at the 100 rate, 500 at the 1000 rate.*

ASPARAGUS ROOTS, Mary Washington. The largest and best variety. It is rust-resistant and very vigorous. Stalks are deep green with purple tops. We raise asparagus roots quite extensively on our own farms and can furnish roots of very superior quality and freshly dug, which is very important. 1-year-old roots, first class. Weight 100-10 lbs., 1000-70 lbs.....	100	1000
2-year-old roots, very strong. Weight 100-14 lbs., 1000-125 lbs.....	\$1.50	\$ 8.00
HORSE RADISH, New Bohemian. ("Maliner-Kren.") Superior to common Horse Radish. Write for special price for large lots. Weight packed for shipping, 100-5 lbs., 1000-40 lbs.....	2.00	13.00
RHUBARB ROOTS, Myatt's Linneaus		
1-year-old. Weight 100 roots 40 lbs.....	1.00	7.00
2-year-old. Weight 100 roots 75 lbs.....	3.50	25.00
SPEARMINT. Weight 100-15 lbs.....	5.00
CHIVES. Good sized clumps. Weight 100-15 lbs.....	6.00
BRUSSELS SPROUTS, Long Island Improved Dwarf. Ready June 20.....	.60	3.50
BROCCOLI, Green Sprouting (Calabrese.) Ready June 20. Weight 100-5 lbs., 1000-25 lbs.....	.75	4.50
CABBAGE PLANTS. Early transplanted plants, ready April 15 to May 15. Well hardened in cold frames and will stand considerable frost. Early Jersey Wakefield, Golden Acre Special, Copenhagen Market, Weight 100-5 lbs., 1000-25 lbs.....	1.00	8.00
Field grown plants, ready middle of June. All leading varieties. Weight 100-5 lbs., 1000-25 lbs.....	.40	2.50
CAULIFLOWER. Early transplanted plants ready from April 25 to May 15. Snowball and Super Snowball. Weight 100-5 lbs., 1000-25 lbs.....	1.25	10.00
Field grown plants, ready June 20. Snowball, Super Snowball and Catskill Snowball. Weight 100-5 lbs., 1000-25 lbs.....	.75	4.50
CELERY. Greenhouse grown plants ready May 1st to June 1st. Golden Self Blanching, Golden Phenomenal and Golden Plume. Weight 100-4 lbs., 1000-25 lbs.....	1.00	8.00

They should be set in frames and allowed to grow for two weeks or more before setting in the field. They are strong seedlings 3 to 4 in. high. Ready April 10 to May 15. Postpaid50	3.50

HARRIS' FLOWER SEEDS

Seed for Raising Cut Flowers

In this class Asters are probably still the leading variety. You will find our Late Branching White and Peerless Pink excellent market varieties with other colors of the Late Branching class to complete the color range. If your demands require something different we have the Sunshine type and also Moreton Brilliant, a deep rose color. If you care to go out and cut Asters in November, we would advise trying a few of the new Peony Flowered class. Annual Larkspur, of course, always gives you that wealth of bloom and color in midsummer when it is so welcome. You will find the best colors listed on page 43. Then there are the Snapdragons in both the Giant-Flowered and the Half-Tall varieties. We offer you a complete color range in both these types, and seed of high germination. In recent years Zinnias have made a great stand as a favorite cut flower. We list ten colors of the Dahlia-Flowered type direct from the introducer. Two other varieties that are highly favored for their color and grace are Pompon Salmon Gem and Picotee Salmon Rose. If you want a large deep orange Calendula for outdoors select our Orange King. And now, of course, you want annual Baby's Breath. You will find our strain the best obtainable and consistently satisfactory. Of course, there are a good many more varieties you will probably grow for cutting, but we have tried to acquaint you with some of our best strains, and now we will discuss with you seed for the second purpose.

Seed for Raising Bedding Plants

Besides the foregoing varieties which we have discussed, there are a great many more that are not cut-flower varieties, but still the grower will find the plants ready sellers for bedding purposes and pot culture. Let us start with Petunias. In the last two years we have made more advances in hybridizing and improving our strains of Ruffled Petunias than any other one company. With the greatest confidence and pride we offer our Paramount Ruffled Giants. Dwarf habit, very large ruffled flowers and a choice mixture of colors. If you do not care for the very best, or if you need a large quantity of seed, select our Dwarf Ruffled Giants. They are second only to our Paramount strain and as good as the best you have ever seen. The price is no criterion of their quality. You will find our bedding varieties also very profitable. Five different colors are listed on page 44. This year we are able to bring you an excellent strain of Bonfire Salvia at a much cheaper price, and of good germination. If considering Pansies, and you are looking for the largest flowered strain obtainable, there is only one choice—Swiss Giants. The size of the blooms and color combinations are unbelievable. Our Special Mixture at a lower price is a genuine bargain. They are mammoth flowered in a marvelous range of colors, very free blooming, and have always been sold at twice our price. Coleus plants always find ready sales in the spring. Our Extra Large Leaved Mixture is a marvelous strain and is a permanent item with all who have tried it.

Descriptions in Our New Retail Catalog

In January you will receive our new retail catalog with full descriptions of these and many more worth while varieties, also a fine list of new novelties printed on colored paper. We assure you that any order placed with us will receive prompt attention and that with the proper care you could not possibly be more satisfied than with Harris' Tested Seeds.

Three Exclusive Harris Varieties

Coleus

W2511—Extra Large Leaved Mixture. For large beautifully colored leaves this is the last word in a Coleus mixture. The seed is saved from only exceptional plants, and we are the only company in this country able to procure this marvelous strain. Each year we receive many letters of praise from growers who have marketed plants grown from this seed. We cannot recommend this too highly. Lg. Pkt. 80c. $\frac{1}{4}$ Oz. \$5.00; $\frac{1}{8}$ Oz. \$9.00

Salvia

W4600—Bonfire. For this year at least, we are able to offer our excellent strain of Bonfire Salvia at a much reduced price. Growing conditions for this seed have been perfect this year, which enables us to lower the price. This strain still retains its high germinating powers and uniform growth. It is an early blooming variety, and we certainly cannot urge you too strongly to take advantage of this offer. Lg. Pkt. 15c; Oz. \$1.50; $\frac{1}{4}$ lb. \$5.00.

Petunias

W3802—Paramount Strain If we could sit down beside you to help you in ordering, we certainly would urge you to include these Dwarf Ruffled Petunias. It is an exclusive strain with us and the test of comparison will prove that better Petunias just aren't grown. We select our stock from thousands of plants perfect in habit and rich in colors. This gives us our superior strain. 200 Seeds 30c; 500 Seeds 55c; 1000 Seeds 90c; $\frac{1}{8}$ Oz. \$5.50; $\frac{1}{4}$ Oz. \$10.00.

"We have used Harris' seed almost entirely and found them strong and full of life." W. J. Cocker, Canton, Minn.

"My Coleus from your seeds are wonderful. All seeds O.K." Mrs. E. U. Allard, Rumford, R. I.

"We have used your garden and flower seeds for a number of years and find them the best in the world." Geo. F. Yapple, Loch Sheldrake, N. Y.

"I have had more success with your flower seed than with any other." C. J. Kinter, New Castle, Pa.

ASTERS

Harris' Treated Aster Seed is the Best

In order for you to have a profitable crop of Asters it is necessary that we do our part by furnishing you with good seed of high germination, and the very best quality in the most desirable varieties.

Although we have been trying our best to give you seed with these qualifications, we are going still further and chemically treating our seed as a preventive against any diseases that may be carried on the seed.

We maintain an extensive testing garden for Asters where we compare all different varieties while growing side by side. In this way we carefully select the most desirable sorts.

	Lg.	Pkt.	Oz.
W1066—PEERLESS PINK. A strain of our own growing selected to give you better flowers of this dependable pink..	\$.15		\$1.75

Harris' Paramount Ruffled Petunias

PETUNIAS

Each year there is an increasing demand for good Petunias and the florist or plant grower who can offer plants with the assurance that his customers will be satisfied is bound to make money. Those which we list have been tried out with others and selected because of their superiority.

Harris' Best Two Petunias

W3802—Harris' Paramount Ruffled Giants. A new strain that we have developed and grow ourselves. The seed was all saved from immense hand fertilized flowers in the widest range of colors. The plants were all dwarf and compact. This variety should give most satisfactory results and is, without exception, the BEST strain we have ever seen. 200 seeds 30c; 500 seeds 55c; 1000 seeds 90c; $\frac{1}{16}$ oz. \$5.50; $\frac{1}{8}$ oz. \$10.00.

W3800—Harris' Perfection Double. Our strain of Double Petunia is exceptionally fine. The flowers are very large and in a splendid range of colors. 200 seeds 75c; 500 seeds \$1.25; 1000 seeds \$2.00; $\frac{1}{16}$ oz. \$3.00; $\frac{1}{8}$ oz. \$5.50; $\frac{1}{4}$ oz. \$10.00.

W3827—Heavenly Blue.....	.35	3.50
W3805—Special Dwarf Mixture.....	.15	1.50

Extra Fine for Low Price

W3810—Giant Double. A European strain that is cheap in price but fine in quality, with a good assortment of colors. 200 seeds 25c; 500 seeds 50c; 1000 seeds 80c; $\frac{1}{16}$ oz. \$5.50; $\frac{1}{8}$ oz. \$10.00.

W3806—Dwarf Ruffled Giants of California. A splendid strain for pot culture. Large flowers, open, beautifully veined throats on low compact plants. 200 seeds 15c; 500 seeds 30c; 1000 seeds 45c; $\frac{1}{16}$ oz. \$2.00; $\frac{1}{8}$ oz. \$3.50; $\frac{1}{4}$ oz. \$6.00.

W3801—Ruffled Giants or Giants of California. The best Giant Ruffled Petunias we can possibly obtain from any other source. 200 seeds 20c; 500 seeds 40c; 1000 seeds 75c; $\frac{1}{16}$ oz. \$3.00; $\frac{1}{8}$ oz. \$5.50; $\frac{1}{4}$ oz. \$10.00.

W3815—Ruffled and Fringed Mixed. A mixture of different types and colors. Lg. Pkt. 25c; $\frac{1}{16}$ oz. \$1.75; $\frac{1}{8}$ oz. \$3.00.

W3813—Fringed Theodosia. Large Rosy Pink. 200 seeds 30c; 500 seeds 55c; 1000 seeds 90c; $\frac{1}{16}$ oz. \$5.00.

W3816—Purple Prince. A deep velvety purple color slightly ruffled. Very desirable and always a ready seller. 200 seeds 40c; 500 seeds 80c; 1000 seeds \$1.40; $\frac{1}{16}$ oz. \$10.00.

PANSIES

Each year we improve the quality of our Pansy seeds selecting from our extensive trials those that by comparison are superior. Repeated tests for germination are made throughout the year to insure a high percentage on all seed that is sent out.

NEW SWISS GIANTS

W3705—Magnificent Mixture. No description can do justice to this new strain of Pansies. The enormous blooms measure three inches or more in diameter and the colors are unusual. Stems are long and foliage luxuriant, adapting them to greenhouse as well as outdoor culture. Lg. pkt. 65c; $\frac{1}{8}$ oz. \$1.25; $\frac{1}{4}$ oz. \$2.25; oz. \$8.00.

W3738—New Blue Swiss—A solid blue with darker blue blotch. Lg. pkt. 85c; $\frac{1}{8}$ oz. \$1.90; $\frac{1}{4}$ oz. \$3.75; oz. \$15.00.

W3739—New Red Swiss. Same type as the blue, but a mahogany red color. Lg. Pkt. 85c.

W3736—New Yellow Swiss. Another of the type but a yellow color with black blotches. Ret. Pkt. 45c.

W3708—Giant Colossal Record—A selected stock of Swiss Giants with size of bloom that is truly a record. Ret. Pkt. 45c.

HARRIS' SPECIAL MIXTURE

W3700—This mixture is especially made of the very best varieties and choicest colors. We make a special point of this medium price mixture. The flowers are all large, many ruffled and with bright colors predominating. Lg. Pkt. 25c; $\frac{1}{4}$ oz. \$1.00; oz. \$3.50.

GIANT TRIMARDEAU PANSIES

W3701—Mixed Colors. A high grade mixture of choicest colors of large-flowering Pansies. Large pkt. 15c; $\frac{1}{4}$ oz. 30c; oz. \$1.00.

GIANT RUFFLED PANSIES

W3702—The flowers of this mixture have fluted or ruffled petals which adds much to the beauty of the wonderfully rich colors. Large pkt. 25c; $\frac{1}{8}$ oz. 60c; $\frac{1}{4}$ oz. \$1.00; oz. \$3.50.

SEED OF HARDY PERENNIALS

Anyone who is growing flowers for sale realizes that there is a very steadily increasing demand for perennials. For years we have been working on these, comparing, selecting and discarding. Some varieties do not come true from seed but for those that do we believe we have by far the best seed that is being offered today, much of it being grown here on our own farm and picked from only the best plants. Since many varieties even at their best germinate very slowly it is most important that only the freshest and best seed be sown. There is no more profitable outdoor line for either florist or roadside market than perennial plants. Those grown from Harris' seeds will insure satisfaction and increasing sales.

For more complete descriptions of the following varieties see our general catalog.

Please Notice

NOTE—We do not furnish any $\frac{1}{4}$ ounces at less than 20c. Fractions of ounces will be supplied as follows:

ZINNIAS

Good Zinnias are one of our specialties and we put forth a great deal of effort to have the best possible. Each year we select only the best kinds from our extensive test gardens and discard those less desirable.

GIANT DOUBLE DAHLIA FLOWERED ZINNIA

Immense flowers in the most striking colors and we have selected the best of them. The true type resembles a giant Show Dahlia.

SEED OF HARDY PERENNIALS

Anyone who is growing flowers for sale realizes that there is a very steadily increasing demand for perennials. For years we have been working on these, comparing, selecting and discarding. Some varieties do not come true from seed but for those that do we believe we have by far the best seed that is being offered today, much of it being grown here on our own farm and picked from only the best plants. Since many varieties even at their best germinate very slowly it is most important that only the freshest and best seed be sown. There is no more profitable outdoor line for either florist or roadside market than perennial plants. Those grown from Harris' seeds will insure satisfaction and increasing sales.

For more complete descriptions of the following varieties see our general catalog.

INSECTICIDES, FERTILIZERS, ETC.

EVERGREEN

We have found this new spray material very effective against the common garden insects. It is very effective against a wide range of greenhouse insects.

NON-POISONOUS; Evergreen is harmless to man, and animals. Will not injure the most delicate plants and flowers. Evergreen is economical to use.

1 oz. bottle.....	\$.35	Postpaid
6 oz. bottle.....	1.10	Postpaid
16 oz. bottle (pint).....	2.15	Postpaid
32 oz. can (quart).....	3.50	By express
1 gal. can.....	11.50	By express
5 gal. can.....	45.00	By express

Send for free booklet containing many valuable facts about Evergreen.

TOBACCO DUST. Used extensively for dusting plants. For fumigating greenhouses the tobacco dust we sell is most excellent. Five pounds will fumigate a house 20 x 100 feet. 2 lbs. 35c postpaid; By Freight 10 lbs. 50c; 100 lb. \$3.50.

BLACK LEAF 40. (40 per cent Nicotine). A very effective insecticide for aphids, "lice" and all soft-bodied insects. 1 ounce bottle 35c; 5 oz. \$1.00; 1 lb. tin \$2.50; 2 lb. tin \$3.75; postpaid. By Express 5 lb. tin \$7.00; 10 lb. tin \$11.85.

FORMALDEHYDE. (40 per cent). A valuable disinfectant for destroying germs that cause diseases in plants. In one-pound cans 40c per can; 6 cans \$2.15 postpaid. 100 lb. Carboys (about 12 gal.). Write for Special Price.

ARSENATE OF LEAD. This is the best poison to use against worms and insects that eat leaves of plants, fruits, etc. Powder: ½ lb. 25c; 1 lb. package 35c; postpaid; By express 4 lb. bag 95c; 6 bags (24 lbs.) or more at 19c per lb.

CORROSIVE SUBLIMATE (Bichloride of Mercury). This powerful disinfectant is used to treat potatoes, and in the control of cabbage maggots. ¼ lb. 90c; 1 lb. \$3.35; 5 lbs. or more at \$3.00 per lb.

BORDEAUX MIXTURE. Used for spraying plants and trees. ½ lb. box 25c; 1 lb. 40c postpaid. By express, 4 lb. bag \$1.00; 6 bags (24 lbs.) or more at 20c per lb.

CUT WORM KILLER. A poisonous bait which kills cut worms. Very effective if used when the worms first appear. 1 lb. package 50c postpaid. By express, 5 lb. \$1.60.

Pot Labels and Garden Stakes

Keep a record of the kind and variety of seeds sown, dates, etc.

5 in. long.....	.22 1.90	.28 2.30

If Pot Labels are to be sent by freight with other goods, 10c per 1000 may be deducted from prices quoted.

GARDEN STAKES. (By freight)

	Plain	Painted
	100 1000	100 1000
12" long, 1½ wide.....	\$1.25 \$9.00	\$1.50 \$10.50

These are good, smooth, white wooden labels of best quality.

Lang's Hand Weeder

This is one of the most useful tools for hand weeding made. A boy with one of these weeders can do twice as much work in a day as he could without it. Price 25c each; 3 for 65c postpaid.

Raffia—Better than String

Used for heavy bundles of plants, for tying plants to stakes, for budding and grafting and many other purposes. It is very economical and costs less than string. Lb. 30c; 5 lbs. \$1.25.

Garden Line

Good strong hemp garden line. 50 feet 50c; (by mail 55c); 100 feet 75c; 200 feet \$1.25. Weight 1 lb. per 100 feet.

Protect Your Seed Corn From Crows

If you are troubled with crows and other birds pulling up your seed corn, treat it with **STANLEY'S CROW REPELLENT.** We use it on our own farm for corn, melons and cucumbers. Will not harm the seed or clog the planter. Small Can (enough for 1 bu.)... \$.60 Large can (enough for 2 bu.)... 1.00

Peat Moss

We consider Peat Moss to be one of the most valuable materials for conditioning soil which we have yet found.

Peat Moss is remarkable in its ability to absorb and retain moisture.

We use a large amount of Peat Moss in our greenhouses and in the open ground. Soil mixed with Peat Moss makes ideal material for seedlings and potted plants. It has good drainage and will not crust or bake after watering, becomes incorporated in the soil and adds humus to it.

Our Peat Moss is of very superior brand finely granulated, and free from any foreign matter. It is put up in bales, (about 20 bu. when ground) enough to cover more than 240 square feet 1 inch deep.

Price—Single bale, \$3.25; 5 bales or more at \$3.00 per bale.

Write for prices on larger quantities.

PULVERIZED SHEEP MANURE. This is high grade material. There is no straw or other rubbish in it.

10 lb. bag.....	\$.60
50 lb. bag.....	2.00
100 lb. bag.....	3.00
1000 lbs. 10 bags.....	21.00
1 ton.....	40.00

NITRATE OF SODA. Gardeners should always have some nitrate of soda on hand. By freight, 10 lbs. 65c; 50 lbs. \$2.50; 100 lbs. \$4.25; 200 lb. bag \$7.50. Write for prices on larger lots.

BONE MEAL. This bone meal is raw bone finely ground. It contains 4½ per cent ammonia (nitrogen) and 50 per cent phosphate of lime. By freight, 10 lbs. 60c; 50 lbs. \$2.25; 100 lbs. \$4.25. Bags of 167 lbs. \$5.60 per bag. Lowest prices will be quoted on large lots at any time.

SULPHATE OF AMMONIA. Contains 25% ammonia and is therefore richer in nitrogen than nitrate of soda. By freight, 10 lbs. 65c; 50 lbs. \$2.50; 100 lbs. \$4.75.

"Auto-Spray" No. 9

This is the best made and most convenient hand sprayer we know of. We use it on our own farm and can highly recommend it. It is very easy to operate, a few strokes of the pump compressing the air on the solution. Capacity 4 gal.

PRICE:

Auto Spray No. 9—Brass tank.....	\$9.50
Auto Spray No. 9—Galvanized tank.....	6.50
Extra 2 ft. brass extension.....	.55 each

Prepaid to places in the United States.

See our **General Retail Catalogue** for full description of this and other sprayers.

Mulch Paper

The use of Mulch Paper not only keeps weeds from growing but it also keeps the moisture in the ground and keeps the ground at a more uniform temperature—not so hot in the daytime and warmer at night.

We got our earliest and best Bender Melons this year from rows covered with Mulch Paper.

By covering with mulch paper before planting the seed, weeds can be kept out without any trouble. The paper is placed over the rows or hills and a hole cut in it where the seeds are to be planted. The paper also stimulates the growth of plants making them more vigorous and productive. *Circulars and directions for using will be mailed on application.*

Tools are now being built for laying the paper on a large scale quickly and effectively. We should be glad to furnish information in regard to these new tools to any one interested.

"Gator Hide" Mulch Paper (in rolls)	
Grade "A" Light, 18 in. 300 yards....	\$3.00 per roll
" " "B" Heavy, 18 in. 150 yards....	3.00 per roll
" " "A" Light, 36 in. 300 yards....	6.00 per roll
" " "B" Heavy, 36 in. 150 yards....	6.00 per roll

Special prices for large lots. Please write us before buying.

Use SEMESAN

**Make Good Seeds Grow Better
Prevent Damping Off
Stop Seed Rotting in the Ground**

We have found on our own farm and in our greenhouses that the use of **Semesan** products is a paying proposition. Corn of high germination will often when the weather is unfavorable lie in the ground and not sprout. On our own farm Semesan treated seed corn has grown 100% better than untreated seed under such adverse conditions and doubled the crop. In the greenhouse we find that sprinkling the soil with Semesan solution **controls damping off**. The process of treating seed and soil is so easy, and the cost so small that no grower can afford not to take these simple precautions to **Insure Better Crops**.

SEMESAN is now available in four forms:

SEMESAN—Can be applied in either the liquid or convenient dust form to prevent or control effectively a great variety of parasitic diseases and fungoid growths borne by seeds, bulbs, seed pieces, plants, grafts and soils. Semesan is harmless to seed and plant life but extremely poisonous to disease and fungous organisms. It generally also hastens germination. 1 oz. makes 3 gal. of solution. 2 oz. 50c; 1 lb. \$2.75; 5 lbs. \$13.00; 25 lbs. \$56.25.

SEMESAN Jr.—A less expensive but equally effective form of Semesan for the dry dust disinfection of both field and sweet corn seeds. Two ounces will treat 1 bu. of seed corn. 4 oz. 50c; 1 lb. \$1.75; 5 lbs. \$8.00; 25 lbs. \$31.25.

SEMESAN Bel (New Improved)—One pound of the New Improved Semesan Bel will treat 60-70 bushels of cut potatoes. It also possesses great disease control properties especially in respect to Rhizoctonia and seed-borne Scab.

The "Instantaneous Dip" method of applying new Semesan Bel saves time and labor. 4 oz. 50c; 1 lb. \$1.75; 5 lbs. \$8.00; 25 lbs. \$31.25.

CERESAN—The new disinfectant for seed treatment of small grains, has proved effective in controlling seed-borne diseases of wheat, barley, oats, etc. Will not injure seed or grain drill. Only 2 oz. required to treat a bushel of wheat or rye, and 3 oz. to a bushel of oats. 1 lb. 75c; 5 lbs. \$3.00; 25 lbs. \$12.50.

Write today for booklet describing the use of Semesan Products. They will be sent free.

New Method of
Plant Protection

In order to grow profitable vine crops, the grower must do everything possible to insure the greatest yield of early fruit at a minimum cost. The use of *Hotkaps* has proved a decided advantage in growing these crops.

Hotkaps are simply scientifically constructed wax paper cones, which are placed over the plant or hill of seeds in the field. They act as miniature **hot houses**, enabling the grower to set out his plants or plant his seed as soon as the ground gets warm, as they afford perfect protection from frost, wind and beating rains. Hotkaps also protect the young plants from insects, such as the striped beetle which does so much damage to young plants. It also prevents the ground from baking around the plant. **This makes for earlier and better fruit.**

We have used hotkaps on our own farm for a number of years and find the cost is many times repaid in earlier fruit and better yields. Growers of early sweet corn find they can plant their seed earlier without danger of the plants being killed by late frost.

"Hotkaps are truly a success. Our melons are up, protected from bugs and frost, while those of our neighbors are not planted yet." J. A. Hopewell, Comargo, Ill. May 7, 1930.

"I might mention that by planting Harris' Extra Early Bantam corn under Hotkaps, I had corn on July 4th last year." Norman Huston, Brookhaven, N. Y. Mar. 5, 1931.

PRICES—250 with special setter and tamber \$4.00 (weight 9 lbs.). 250 without setter and tamber \$3.70; 500 with setter and tamber \$6.00; 500 without setter and tamber \$5.70; 1000 Hotkaps without setter and tamber—\$11.00 (weight 26 lbs.). 5000—\$10.75 per 1000; 10,000 or more \$10.50 per 1000 *not prepaid*.

For full details and prices of Hotkaps in smaller quantities see our General Retail Catalogue.

Steel Hotkap setter and tamber—\$2.50 (weight 3 lbs.)

Folder giving full description and directions for using Hotkaps will be sent to anyone interested on request. Please write.
